

# Elephant Trax QR Labels

## Use and Care Guide

Elephant Trax Smart QR labels are made from a durable material and finish to provide superior longevity over and above ordinary paper labels. Elephant Trax Smart QR labels are:

- Fade Resistant
- Tear Resistant
- Water/Moisture Resistant

Quality and longevity can be affected by the elements and conditions in which they are utilized. To maximize the longevity and usability of the labels, adhere to the below guidelines for using your labels.

### **Exposure to Elements**

- Avoid prolonged exposure to moisture, as it may reduce the effectiveness of the adhesive.
- If labels are submerged in water for a long period of time, it may reduce the integrity of the label and cause some degradation of the ink on the label and consistency of the label.
- Avoid excessive and persistent exposure to direct sunlight, as some fading may occur over time.
- For best scanning results, wipe any debris or dirt from the QR code surface with a dry cloth to allow for maximum readability and scanning of the QR code.
