Care and Cleaning Instructions

For Indoor/Outdoor rugs:

With a dry cotton towel or white paper towel, blot out the stain as much as possible. Scrape off debris. Mix a very small amount of dish soap with a cup of cold water. With a clean sponge and soap mix, remove the remainder of the stain. Allow the area to dry. For all-over cleaning, spray with a mixture of soap and water and rinse with a garden hose.

For Natural Fiber/Jute/Hemp/Coir/Sisal rugs:

Regularly vacuum the rug on a low-power setting. Vacuum the rug from different angles. If you see any loose threads on the face, they should be trimmed with scissors. Do not pull the threads on the face to avoid unraveling or damage to the rug. Spills should be blotted with a clean, dry cloth to absorb as much of the spill as possible. Work from the outer edges of the spill towards the center. Gently blot the area.

For Shag rugs:

Do not pull the yarn out, as this may result in damage to the rug. Canister vacuums without a beater bar are most effective in cleaning shag rugs.

For Synthetic Fibers-Olefin/Polypropylene/Nylon rugs:

With a dry cotton towel or white paper towel, blot out the stain as much as possible. Scrape off any debris. Mix a very small amount of dish soap with a cup of cold water. With a clean sponge and soap mix, remove the remainder of the stain. Blot the area with a dry towel.

For Wool rugs:

With a dry cotton towel or white paper towel, blot out stain as much as possible. Scrape off any debris. Mix a very small amount of dish soap with a cup of cold water. With a clean sponge and soap mix, gently remove the remainder of the stain. Avoid using excessive water. Blot area with a dry towel. Vacuum regularly. Avoid vacuums with invasive beater bars. We recommend using a professional rug cleaner on an annual basis.
