Bellini Strawberry Crape Myrtle Manual

Bellini Strawberry Crape Myrtle brings big summer color with its rich, rose-pink blooms that create a stunning show from late spring to late summer. Perfectly compact and tidy, this variety effortlessly upgrades your patios, borders, or small-space containers with glossy green foliage that transitions to orange-and-yellow during fall. It’s the season-long vibrant energy you want in a plant, neatly packaged to fit exactly where you need it.

Just give it a spot where it can soak up full sun (the lighter it gets, the more spectacular those blooms will be!) and regular watering until it's established. You can keep the show going by snipping off faded flower clusters to encourage another flush of late-season blooms.

Mature Height:	3-4 ft.
Mature Width:	3-4 ft.
Sunlight:	Full Sun
Growth Rate:	Moderate
Botanical Name:	Lagerstroemia indica 'Strawconbel' PP 33
