

how to use febreze

plan a full-scale odor attack

Fighting odors around your home can feel like a losing battle. Well, we say leave no guest behind! Here's our winning routine for fighting funky odors on every front, and making sure every guest breathes happy.

Febreze Clothing: refresh your wardrobe

There's nothing quite like finding a jacket that goes with everything in your closet. But when you're wearing the same piece over and over again, even if it's not "dirty-dirty" ... it could probably use a refresh. Keep **Febreze CLOTHING** on hand and spray freshness back into your lightly worn clothing items so you can keep on rockin' that outfit.

Febreze FABRIC: spritz away odors

Your bestie will be looking for a cozy seat when she arrives. Too bad the woven fibers of your comfy couch (and your curtains. And that rug. And the dog bed.) are a go-to hiding place for unwanted odors. While you can't cram that cushion in the washer, you can top every pillow-fluffing session with a spritz of **Fabric Refresher**. Just spray until damp, let dry, and enjoy!

Febreze AIR: eliminate odors in an instant

Unleash your freshness force with a sneak attack. Typical air fresheners just add another smell to the mix, but **Air Effects** actually eliminates airborne odors and leaves an instant burst of lightly scented freshness in its wake.

Febreze PLUG: switch it up

Try something pluggable to help continuously clean away stink. A Febreze **PLUG** with Fade Defy Technology automatically alternates between two scents without any extra effort for a first-day fresh that lasts 50 days.*
