

BIRD•B•GONE[®] INC.

envirospike[™]

**Patent Pending*

Installation Instructions

Enviro-Spike from **Bird-B-Gone, Inc.** is a low cost, environmentally friendly bird spike used to prevent large birds from landing on flat or curved surfaces. **Enviro-Spike** comes in 2' (.61 m) sections and measures 5" (12.7 cm) in width. The spike is made from a flexible UV protected polycarbonate plastic base with stainless steel pins. Enviro Spikes come fully assembled and ready for installation.

To Install:

1. Clean and Dry Surface.

Make sure bird droppings and other debris is cleared away. Use a disinfectant to clean the area. Wait for the surface to dry before installation.

2. Choose Method of Attachment:

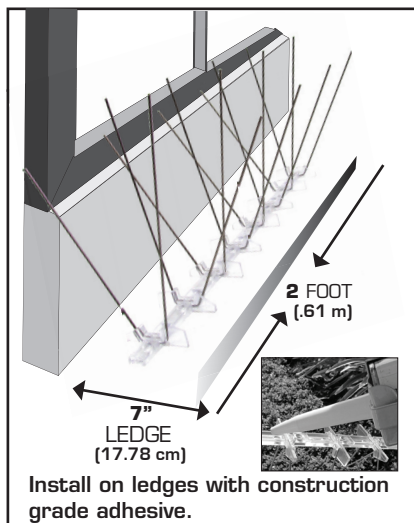

1. **Glue:** Use a polyurethane outdoor adhesive. Apply the glue along the center of the base, press down onto surface until the glue "mush rooms" up through the glue/screw holes.
2. **Screws:** Use wood screws to attach to wood surfaces. Screw into pre-drilled holes along the base.
3. **Tie down:** For pipes and other areas, secure spikes with zip ties by wrapping the tie down around the base and securing.

3. Spike Placement :

- Leave no more than 1" (2.54 cm) in front of or behind the spike strips. Wider ledges may require multiple rows.
- Enviro Spikes come in 2' (.61 m) sections, for smaller areas, cut the base with tin snips or wire cutters.

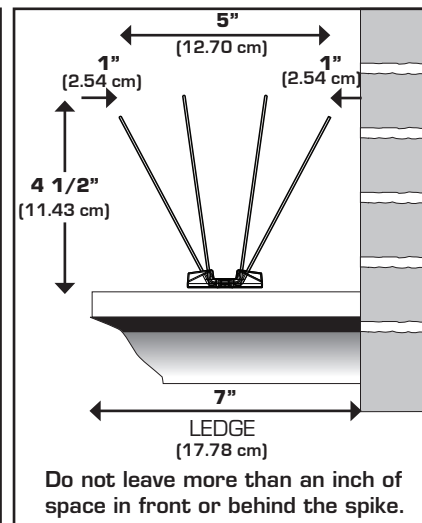

Ideal For:

- | | |
|------------|--------------------------|
| -Rooflines | -Window Sills |
| -Eaves | -Beams |
| -Ledges | -Flat or Curved Surfaces |

Side View:

Enviro Spike comes in 2' (.61 m) sections that are 5" (12.7 cm) wide and come fully assembled.

View of Base:

Pre-drilled holes along the base allow for secure adhesion or installation with wood screws.

CAUTION: READ AND FOLLOW ALL INSTRUCTIONS PRIOR TO INSTALLING BIRD-B-GONE ENVIRO SPIKE. SPIKES ARE SHARP. BE SURE TO WEAR GLOVES. KEEP OUT OF REACH OF CHILDREN AND PETS. DO NOT INSTALL WHERE HUMAN PHYSICAL CONTACT IS POSSIBLE.

enviropike[™]

**Patent Pending*

Installation Instructions

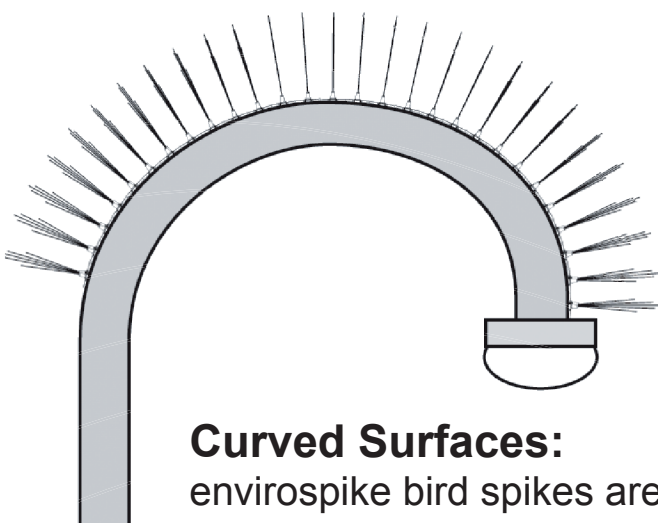

Applications

Ledges:

Birds can often be found congregating on ledges and rooftops. Install enviropike to keep birds from creating unsightly messes or damaging building materials.

Curved Surfaces:

enviropike bird spikes are flexible and can be installed by using common hose clamps, nylon ties, or wire lashings.

Conduits:

enviropike can be attached to conduits, gutters and pipes using common hose clamps, nylon ties or wire lashings.
