

Manual For MGP Willow Cone Trellis, Circular Willow Trellis

Thank you for purchasing our willow circular trellis.
With a few simple steps you will have a circular trellis that
you can use in many different ways.

Master Garden Products

1

First, set the trellis up vertically(1). Then bend into a circular shape.

Using the Provided Zip Ties, fasten them around the sticks on each end as shown in fig. 2, 3, 4. *Some models may only need 2 zip ties, not 3*

Repeat this process on the bottom of the trellis. The trellis is assembled and ready to use. This does stand alone, but can be secured with stakes for more stability.

To make a larger trellis/circle, simply attach more pieces together on one side, then follow above directions to complete the circle.

Please contact us if you have any questions regarding set up or use of this product.
