

T16 Series Indoor/Outdoor Thermometer Installation Guide

To fully enjoy this beautifully crafted large spirit tube thermometer please read the following information:

Designed with easy-to-read numerals that are double the size of those found on most thermometers, this thermometer has been carefully designed to produce precise temperature readings. Displaying both Fahrenheit and Celsius scales the Grand View Thermometer uses accurate spirit tube technology and is entirely mercury free.

Ideal Thermometer placement

For accurate readings, install your thermometer in a spot away from direct sunlight. If using outdoors, a shady location is ideal.

About your Thermometer

This thermometer is mercury-free and utilizes “spirit tube” technology. As the temperature rises, the expansion of the red-tinted mineral spirits in the bulb forces the liquid column to move up within the tube. The tiny column of red fluid is made clearly visible by the magnifying shape of the glass capillary tube.

Tools Needed

Phillips head screw driver

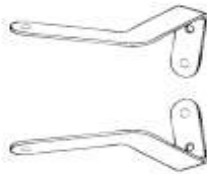

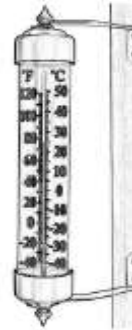

Approximate installation time -  minutes

Hardware Included

Thermometer

2 mounting
brackets

Mounting Instructions

Unscrew top and bottom finial caps from thermometer. Attach two bracket arms to thermometer and then screw finials back into position. Be sure top bracket arm is pointing down and bottom bracket arm is pointing up. Position the bracket arms on the trim of your window or door so that arms are facing the viewing area. Mark the screw locations and pre-drill four holes. Position thermometer brackets in line with holes, insert wood screws and tighten firmly.

Questions? Problems? Before returning your product to the store, please give our customer service team a chance to help. Call us toll free at 1.800.638.0428 from 8:30 to 5pm EST or email us at support@conantcollections.com for prompt resolutions to questions regarding operation, parts or repair of your Conant product.
