9. This product **MUST** be installed/serviced by a qualified service technician.

## SAVE THESE INSTRUCTIONS

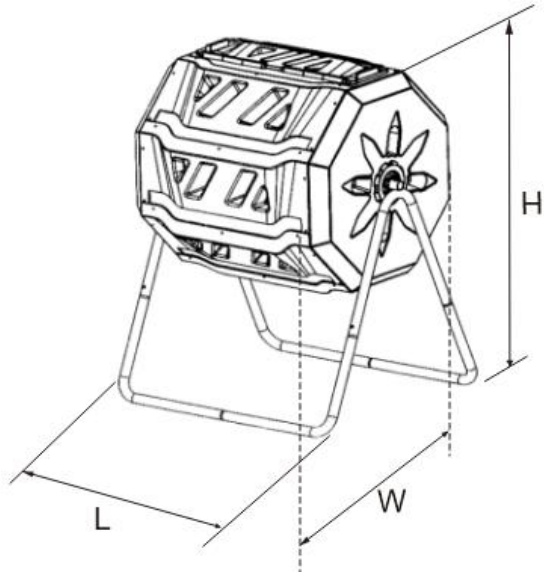

Thank you very much for choosing our product. Please read all the instructions before using it. The information will help you achieve the best possible results.

## INTRODUCTION

- This product is used to turn your food waste into garden gold. It transforms kitchen and garden waste into rich, fertile compost. Ready-to-use compost will be yours in just 4-6 weeks; it's unique aeration system. Internal mixing bars speed up decomposition to make growing a happy garden easier than ever!
- Reduce your carbon footprint – Studies show that approximately one-third of the world's food supply goes to waste. But with VEVOR's rolling compost box, you can do your part to change that. Help the environment, and cook up some compost that your plants will love.
- Year-round, hassle-free – Why should composting be a seasonal activity? VEVOR's heavy-duty design lets you keep your compost going all year round! The sturdy side-locking mechanism ensures easy loading and unloading, while the durable construction maintains a tight seal.

## Installation

One person may install it with brief help from additional personnel. Use these instructions to ensure the correct installation function. And operation of product VEVOR Corporation reserves the right to modify appearances and specifications without notice.

<p>Step1: Pull the two doors in Accessory A apart.</p>	
<p>Step2: Connect the two end cover panels A and C, tighten the four groups of screws and nuts, and ensure that the nuts are installed inside.</p>	

Step3:Rotate 1/8 circle to connect panel B with A and C, and note that the skirt of B should be pressed on C, so that the connection can be effectively made.there are 4 sets of screws between B and a, and 3 sets of screws between B and C to fix.The same,make the nuts are installed inside.

Step4:According to the method of step3, two panels B are continuously installed, and half of the cavity is completed at this time,and then Install divider E.  
Note:Make sure the arrow on divider E face to the arrow on plate B when insert divider E.

Step5:According to the method of step3, the remaining 4 panels B are continuously installed, and the entire cavity installation is completed at this time.  
At this time, the door panel of panel C can be inserted to complete the installation of the entire chamber.

Step6:As shown in the figure on the right, assemble the support “bb”、 “cc” and“dd”. There are spring buckles at the connecting holes, and the assembly can be completed by inserting the spring buckles into the pin holes.

Step7:Insert the support rod “aa” into the center of the entire cavity, then insert cap J into the holes at both ends of the support rod “aa”.

Step8:The whole chamber is installed above the bracket and locked with 2 sets of screws and nuts G, at this time the entire compost machine installation is completed.

## How to compost

Here, we recommend you how to compost.

1. Collect some of the waste generated in your daily life, such as apple peel, banana peel, vegetable leaves, egg shells, etc.

Pour them into the composter.

2. Add garden dead leaves even scraps of paper, you don't need to care about the proportion of green organic matter is how much, but the best effect is (25-30) : 1. You can also add some bran, which is more effective for fermentation of the compost.

3. Add some clean water to the mixture to make it easier to ferment when they become moist, rotate the composter make them mix, Internal mixing bars aerate material while turning to help accelerate decomposition.

When composting, place a basin under the compost machine to receive the liquid from the composter, which can be used to water the trees and flowers in your garden.

4. Ready-to-use compost will be yours in just 4-6 weeks. The compost is done when it's dark and crumbly with an earthy smell.

**Caution:**

- Check that the compost is slightly damp, and add water when needed.
- **Turn the compost 5-10 rotations at least 2-3 times a week.**
- **Aerating vents help promote fast composting with air flow as needed.**
- **Empty the compost into a bucket, wheelbarrow, or tarp.**
- **Use the compost in your garden.**
- **Do not compost with grass and leaves that have been sprayed with insecticide.**
