

Assembly

Element Fire Glass can be used in any natural or propane gas powered fire application. Glass can be used indoor or outdoor

All fire glass manufactured by Element Fire Glass is tempered high quality heat treated glass to withstand temperatures produced in fire places and fire pits.

Each bag contains 10 pounds of fire glass. Ten pound of glass covers approximately .47 sq. ft.

Average 18 in. diameter fire pit requires 30 pounds of fire glass.

Now enjoy your glass as your fire dances on top.
