

"Powerblanket drum and bucket heaters are a drastic improvement over the original band heaters we used to offer. With Powerblanket products we no longer have to worry about overheating or unpredictable thermostats. The Powerblanket Technology provides uniform heat throughout the entire barrel of product which is paramount to what we do. Powerblanket products are very durable, look great, and are the only heaters we will offer our customers."

Mike Roberts, Manager Howard Marten Fluid Technologies

PRO SERIES: Includes a thermostatic controller for optimal control which allows you to adjust temperatures from ambient up to 145°F / 63°C (± 5°F / 3°C).*

RR SERIES: Utilizes the Rapid Ramp technology to quickly heat materials to a pre-set safe 100°F/38°C (± 10°F / 6°C).*

ADVANTAGES OF DRUM HEATERS:

- Work on both steel and poly drums
- Provide an insulated, full-wrap design
- Deliver safe, distributed heat to temperature sensitive materials
- Preserve expensive materials without overheating or burning
- Prevent product waste by safely maintaining consistent temperatures

*Product Temperatures may vary depending on boundary conditions

DRUM & BUCKET HEATERS

DRUM HEATERS are one of the most popular lines of Powerblanket® products. The innovative design has changed the conventional method of heating materials by providing targeted and evenly distributed heat to the surface of the drum, thus eliminating hot and cold spots.

The Powerblanket product line is designed for any definitive heating job. Each product is built with a rugged vinyl shell that is safe to use in temperatures as low as -20°F (-29°C). You can be sure that Powerblanket products will keep your equipment warm when temperatures drop well below freezing.

The Powerblanket Lite line is designed for smaller scale heating jobs. These models feature a lower power density, but rest assured, these heaters are the real deal. They are more energy efficient and safer than other heating elements on the market.

The Powerblanket Xtreme line is designed for companies that work in harsher climates. These heaters are built with a durable and long-lasting vinyl shell, making them safe to operate in temperatures as low as -40°F (-40°C). Powerblanket Xtreme will protect your equipment and maximize your yield in the cold.
