

# How To Measure Outdoor Shades (Patio Shades)

Listing Size	Blind Maximum Height	Blind width	Fabric Width	Screw to screw measurement
4'x6'	72"(182.8cm)	48"(121.9cm)	45.55"(115.7cm)	46.85"(119cm)
4'x8'	96"(243.8cm)	48"(121.9cm)	45.55"(115.7cm)	46.85"(119cm)
6'x6'	72"(182.8cm)	72"(182.8cm)	69.57"(176.7cm)	70.87"(180 cm)
6'x8'	96"(243.8cm)	72"(182.8cm)	69.57"(176.7cm)	70.87"(180 cm)
8'x6'	72"(182.8cm)	96"(243.8cm)	93.58"(237.7cm)	94.89"(241cm)
8'x8'	96"(243.8cm)	96"(243.8cm)	93.58"(237.7cm)	94.89"(241cm)

Due to different measurement methods, there may be a 0.5-1.5 inch error.

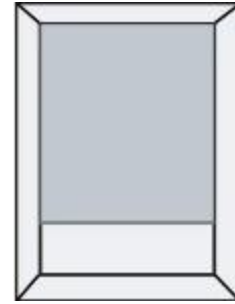

## Getting Started

### Tips before you get started:

- Use a steel tape measure for the most accurate measurements
- If you're considering an Inside Mount, make sure your window has enough depth to accommodate it
- Always measure width (left to right) first and height (top to bottom) second
- Record all measurements to the closest 1/8", making sure to clearly identify which is your height and which is your width—it is very common to get them mixed up

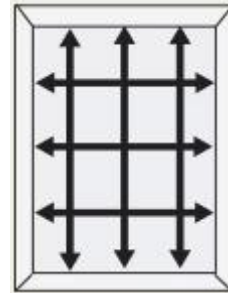

## Measuring for Inside Mount

**Note:** Inside mount shades will have a small deduction automatically applied by the manufacturer, to ensure proper fit.

### Width

- Measure at the depth within the frame where you'll install your brackets
- Measure width at the top, center and bottom of your window opening, from edge to edge
- Record the smallest measurement of the three to the closest 1/8"

### Height

- Measure height at the left, center and right, from top edge to bottom edge
  - Record the largest measurement of the three to the closest 1/8"
- Note: Outdoor shade fabrics may be 2 1/2" narrower than your ordering width to allow for the mounting brackets. If this will create too much of a light gap in your window, please consider ordering an outside mount shade.

## Measuring for Outside Mount

**Note:** Outside mount shades will have no deductions taken at the factory. They will be made according to your exact measurements.

### Width

- Measure the area you want to cover (how far you want the shade to overlap the window opening); we recommend 1 ½" on both sides
- Record your measurement

### Height

- Determine where you want the top of your shade to be and mark the spot
- Measure the height from the spot you marked to the top of the window sill. If there is no sill, measure below the window opening to your desired length
- Record your measurement
