

PLANT CARE

1

Remove and recycle packaging from the plant.

2

Read plant tag for care and to find the best place to plant.

3

Dig a hole twice as wide and just as deep as the plant's container.

4

Remove the plant from its container.

5

Place the plant in the hole, level with the surface.

6

Add soil and fertilizer.

7

Pat down soil around the plant.

8

Water until the soil is moist.

 **Plant with Proven Winners Premium All Purpose Potting Soil.**

 **Mix in Proven Winners Time Release Fertilizer at planting time and reapply every spring.**

 **For annuals, also use Proven Winners Water Soluble Fertilizer throughout the season.**

 **Water well to keep soil consistently moist — not dry or soaking wet.**

 *Enjoy watching your plant grow!*
