Alternative window Compatability

Sliding window

French window

Apply the Magnet Tape on the perimeter of the frame, And follow instructions as shown below. Please make sure that the locks and window handles are not interfering with the window frame.

Any frame with obstructions for the Magnet Tape will cause issues with the installation. Please make sure to install this product on frames with 4 front facing sides.

Assembly

1) Clean surface of any dust where you intend to install your Magic Mesh™ window screen.

2) Remove the backing on the Magnet Tape (A) and apply around the perimeter of the window frame.

3) Trim off any excess Magnet Tape (A).

4) Apply the Groove Magnet Strip (B) Over the Magnet Tape (A).

5) Trim off any excess Groove Magnet Strip (B).

6) Center the Mesh (D) and allow a 1 inch overlap on all 4 corners. Press the 3 Mesh Place Holders (F) onto the Groove Magnet Strips (B) to help hold the Mesh (D) in place.

7) Apply the White Molding Strip (C) over the Groove Magnet Strip (B). Please note to remove the Mesh Place holder (F) when you get to its location.

8) Trim off any excess Mesh (D) that is protruding the White Molding Strp (C).

9) Apply all Corner Moldings (G) to all four corners of the frame.

At this stage, the window screen is now removable.

10) Remove the backing from the Wind Clip (E) and pull the upper right hand corner of the screen. Press down on the Wind Clip (E) onto the magnet Strip (A). Slide the window screen into the groove of the Wind Clip (E).

Repeat these steps to the upper lefthand corner.

USER TIP

USER TIP: When applying the White Molding Strip (D), bend the molding strip upward to form a "U" shape. This tecnique will help open up the teeth on the molding strip for easy application.

USER TIP: If your window screen is damaged, you can repair it by installing this product over your existing screen frame. Trim off the damaged screen and follow the same instructions above to repair it.
