

# Use and Care Instructions

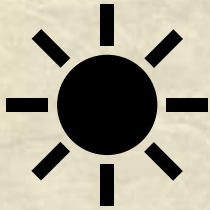

## Codiaeum variegatum

(Croton Mammy)

Grown by United Nursery, the *Codiaeum variegatum*, or more commonly known as Croton Mammy, is a croton cultivar and a standard landscape plant in California and Florida. Mammy Crotons plants are prized for their truly magnificent corkscrew foliage with large, thick, leathery and shiny leaves that are variegated with the various color shades such as orange, red, purple, yellow and green.
