

G103 COMPACT GREASE GUN

Lincoln has introduced its new model G103 grease gun. Developed for low-volume greasing applications, this tool is ideal for do-it-yourself auto repair, lawn and garden, ATV, marine, motorcycle and trailer applications.

Unlike other 3-ounce (85 g) models, the G103 incorporates the traditional lever-action design, which provides better handling and output pressure up to 6,000 psi (414 bar). The lightweight grease gun features a jam-proof handle mechanism, cast-aluminum head, powder-coated barrel and a comfortable vinyl grip.

The G103 uses 3-ounce cartridges or can be hand packed or bulk filled. The tool comes with a replaceable grease coupler and rigid extension. Optional 12- and 18-inch (305 and 457 mm) flex hoses are available.
