

## SUPPLEMENT SHEET

### This Sheet Complements the Use and Care Manual

**▲ WARNING:**

Please read the entire Use and Care Manual included with your water heater in addition to this supplement sheet. If you have any problem understanding these instructions STOP and refer to the “If You Need Service” section of the Use and Care Manual to receive further instructions.

**▲ WARNING:**

Improper installation, adjustment, alteration, service or maintenance of this water heater and associated components may result in improper and inefficient operation and could produce carbon monoxide gas in excess of acceptable limits, which could result in serious injury or death.

Refer to the “Venting” section of the Use and Care Manual included with your water heater. If a restrictor disc is required for your venting and the installation altitude above sea level is greater than 7,000 ft. (2134m) a special restrictor kit will need to be ordered. Refer to the “If You Need Service” section of this manual to learn how to contact customer service personnel and request this kit. Two restrictors will be in this kit, but only one of them will be used depending on the size of the vent pipe.
