

## The Osmocote® Difference

Osmocote® Smart-Release® Plant Food Flower & Vegetable has a high total nutrient content (14-14-14). The unique resin coating reacts at relatively low soil temperatures to give plants an early season start. This formula is favored for seasonal vegetables and perennials because it promotes strong roots as well as bountiful and vigorous above-ground growth.

## Flower & Vegetable

Abono para flores y vegetales

**FEEDS UP TO 4 FULL MONTHS**

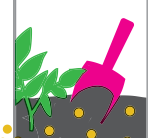

Can Be Used with Edible Plants • Covers up to 320 sq. ft.

### How Does Osmocote® Plant Food Work?

 Osmocote® Plant Food consists of a nutrient granule coated with semi-permeable resin.	 The coating permits water to penetrate the granule and dissolve the encapsulated nutrients.	 These nutrients are released with changes in soil temperature. More nutrients are released during warmer, active growing periods.	 The empty resin shell remains after nutrients are released.
