

Our exclusive Charge Up light spectrum is designed to help naturally increase energy and wakefulness. And, unlike regular LEDs, our lighting is made to sync with your natural circadian rhythms.

- **For use in lamps and lighting fixtures**
- **Ideal for rooms you use primarily during daytime hours**

For Best Results

Think of Brillii like a vitamin that supplements your sunlight exposure. You will notice some benefits immediately, and some over time.

- **Charge Up bulbs should be used throughout the day. You should begin to experience the benefits after 20 minutes.**
- **Make sure you're within 10 feet of the light so it comes in contact with your eyes.**
- **Use Charge Up bulbs at the brightest setting for a more stimulating effect. A light-colored lampshade is preferable.**
- **We recommend using Charge Up and Wind Down light bulbs separately for maximum effectiveness.**

Dimmable
