NEW 15 ft. Steel Fish Tape

Commercial Electric's innovative 15 ft. Steel Fish Tape is an ultra-compact fishtape for installing a variety of wire and cable including electrical wire, speaker wire, and network cable over short runs inside walls and ceilings. The special low-memory steel tape does not curl during extension, easily fishing wire in both conduit and existing structures. It's the perfect tool for installing wiring for electrical boxes, outlets, light fixtures, doorbells, audio, datacom and security systems.

USES

- Feed under carpets, over drop ceilings and down walls.
- Perfect for short runs, install speakers, home networks, cable and other common electrical uses.

FEATURES

- Durable, high-impact housing resists breaking
- Low-memory tape does not curl during extension – perfect for non-conduit situations.
- Compact, rugged design can be stored in tool belt or box
