4.Safety Precautions

1. Ensure all parts are securely fastened to avoid injury or damage.
2. Check the bed regularly for loose parts or signs of wear.
3. Do not overload the bed beyond its weight capacity as stated in the product description.

Care and Maintenance

1.Cleaning

1. **Wood or MDF Frame:** Wipe down with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which may damage the finish.
2. **Metal Frame:** Clean with a damp cloth and dry immediately. For tougher stains, use mild soap and water.
3. **Upholstered Areas:** Use a vacuum with an upholstery attachment to clean fabric areas. Spot-clean with a mild detergent and warm water for any spills. For PU leather or faux leather, wipe with a damp cloth and dry with a soft towel.

2.Regular Inspections

1. Check all bolts and screws every 3-6 months to ensure they remain tight.
2. Inspect the slats for any signs of wear or damage and replace them if necessary.
3. Monitor the bed frame for any signs of instability and address any issues immediately.

3.Weight Capacity

1. Always adhere to the weight capacity specified in the product manual.
2. If additional support is required (such as for heavier mattresses), consider using a bunkie board or additional slats for reinforcement.

Storage and Moving

- If you need to disassemble the bed, carefully reverse the assembly steps.
- Store all parts and hardware together to avoid losing any pieces.
- When moving the bed, lift it from the frame instead of dragging it to prevent damage to the structure.

Thank you for choosing our platform bed. We hope you enjoy many years of comfortable sleep!
