Lighting

After potting, place plants in a shady spot for 4-5 days to acclimate. Plants vary in their lighting requirements. Refer to plant tags for specific sun or shade needs.

Watering

Let mix dry to the touch between waterings. Do not allow plants to sit in drainage water. Outdoor container plants require more frequent watering than indoor plants.

Repotting

Vertical cacti should be planted in containers that have a diameter half the height of the plant, while round cacti should be placed in containers that are 2" greater than the diameter of the plant. Repotting citrus annually to the next larger size container will encourage fruiting.
