Buck

Assemble the deer feet with the body by inserting the wire tubes into the holes located on the body as picture shown.

Buck

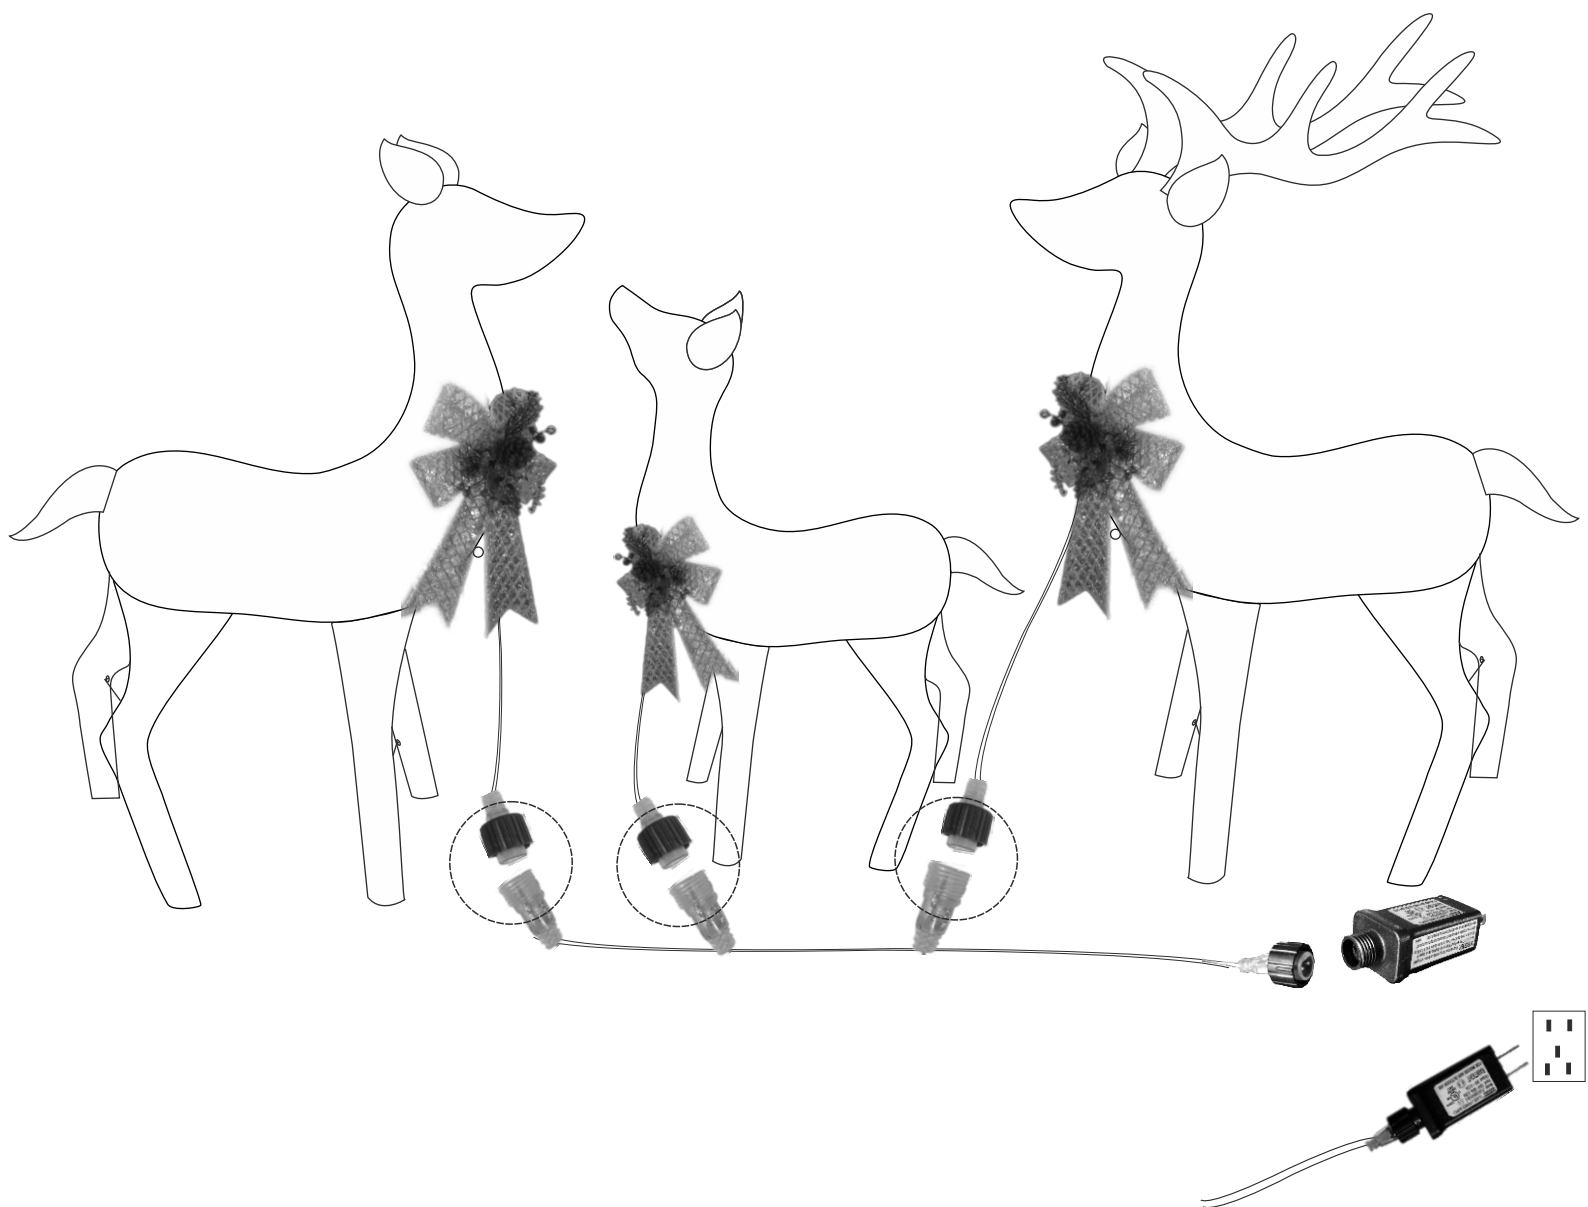

Connect 2 connectors together, use zip tie to connect the deer head with the body, make the 4 feet steady by fixing the wire hook.

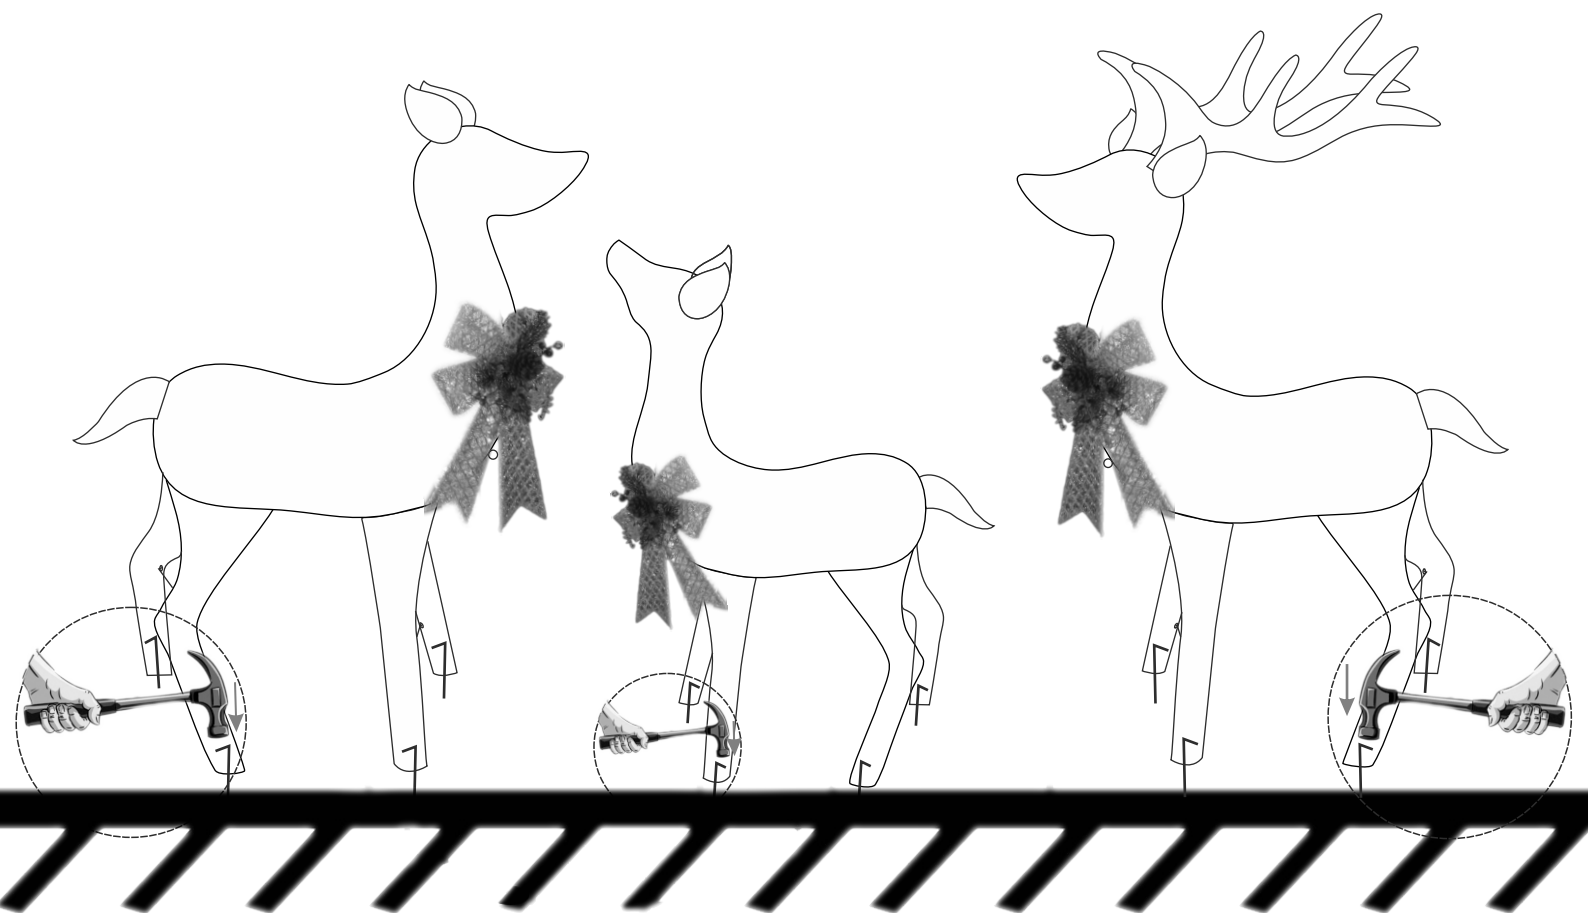

Buck

Assemble the horns, tail and bow as picture shown.

Use the Three-Plugs End Connector to connect three deers cables together, and connect the other end of the connector cable to the transformer.

Assembly is now complete, light up with the transformer supplier. If using outdoor on a lawn, secure the deers by inserting the 4 lawn stakes through the supports and into the soil.
