

Thanks for choosing our product, please read this use and care manual before use this unit.

## **Care and Maintenance**

Before using, wipe up the wicker/rattan with a clean, wet cloth/towel.

To prolong the product lifetime, avoid extended and lengthy exposure to rain and sunshine. Where possible, place under covers and or patio and or awnings. Cushion covers are made with water-repellent coating, but they can't stand heavy rain or much pouring water/ other liquid staying on it for long time.

So please keep cushions inside for rainy days and quickly dry the cover surface once there drops some water/liquid on it. Also, if possible, the furniture should be stored indoors during the cold, winter months.

Wash the furniture and cushions with a solution of mild soap and water allow to air dry completely. Do not use bleach or other solvents.

For cushion covers, we do not recommend for frequent washing, because frequent washing will damage the UV protection coating of the cover. Hand-wash with mild cleanser is firstly recommended in order to protect the coating.

Do not machine wash or tumble dry, as cushion covers may shrink. If machine wash is the only way, please choose soft/delicate mode.

Cleaning the glass top, should be handled with care to avoid causing damage. And please make sure to use a soft, clean cloth or towel.
