

# Congrats, new plant parent!

Here's everything you'll need to know about caring for your new plant.

*lively root*

# All about your new plant

This plant is a sure-fire winner and a great addition to your low-maintenance green space. It requires minimal care and will flourish practically on its own.

## Common Name

ZZ Plant

## Botanical Name

Zamioculcas zamifolia

### Care

Super easy to care for and perfect for beginners!

### Light

This plant prefers low to medium light.

### Water

Allow the soil to dry out completely between waterings.

### Humidity

This plant doesn't require any extra humidity.

### Fertilizer

Fertilize once a month with our organic fertilizer.

### Pets

Keep out of reach for children and pets.

### Air

This plant is great at keeping the air in your space clean!

## Plant pairings

Add to your green space with a Spider plant or a Superba Snake plant. These two plants have similar care requirements and will contrast nicely with your new plant's colors and textures.

## Share your green space!

Tag #livelyroot on Instagram and show us how you're incorporating your plant into your green space.
