Create with Metallic Paint

Metallic Paint
COLLECTION™

Unlimited Stunning Colors

Finding a color that suits your project has never been easier. A wide variety of pre-mixed metallic colors are available as well as our exclusive custom color matching service to the trade.

Metallic colors are inter-mixable for creating one-of-a-kind custom colors and allowing for on-site color modification.

PERFECT FOR:

Hospitality • Commercial/Retail • Residential Corporate Offices • Casinos • Theme Parks

The First Choice in Water Base Metallic Paint

When it comes to choosing a metallic paint for a do-it-yourself project, high-end decorative finish or large architectural specification, Modern Masters Metallic Paint Collection™ has you covered! Our focus on metallic finishes and unique chemistry has made us the world leader in water base metallic paints. Our Metallic Paint Collection products are available in over 4,000 paint retailers in 25 countries around the world. To find a dealer nearest you and to obtain product information and specifications, go to modernmasters.com

Leadership in Energy and Environmental Design (LEED®)

Buildings fundamentally impact people's lives and the health of the planet. Since the LEED Green Building Rating System for New Construction was first published in 1999, it has been helping professionals across the country to improve the quality of our buildings and their impact on the environment.

Metallic Paint Collection™

LEED® EQ Credit 4.2 - Low-emitting non-flat paints

Unique, Water Base, Non-Tarnishing Colors

Real metal particles, pearlescent pigments and traditional color pigments are uniquely combined to create a palette of beautiful, non-tarnishing, shimmering colors. If an oxidized metal finish is desired, use *Metal Effects*.

Matte Metallic Paint

Water Base, Non-Tarnishing, Interior Only

Matte Metallic Paints are formulated with the same shimmering particles and ease of application as our satin Metallic Paint Collection with a new

twist, no sheen! They are beautiful on their own, however when used together with their higher sheen counterparts to create a finish, the results are phenomenal. Available in 15 of the most popular metallic paint colors. For interior use only.

Extender for Rolling (ME651)

When added to Metallic Paint Collection paints, extends the open time or 'wet-edge' of the paint. This added open time allows for 'back-rolling' as a last step to properly orient the metallic particles and eliminate seams. Available in 4 ounce, pint and gallon sizes.

9" Metallic Paint Roller (ME652)

This roller is specially designed for the application of the Metallic Paint Collection paints. The roller's unique, high-quality, European fabric and beveled ends work to create a uniform silk-like finish.

MasterClear® Protective Clear Topcoats

This interior/exterior topcoat, available in Satin and Semi-Gloss sheens, is a water base, one part, self-crosslinking, aliphatic polyurethane/acrylic, non-yellowing

topcoat. Formulated to create the best possible protection for Metallic Paint Collection paints without affecting the metallic shimmer. Not intended for use with Matte Metallic Paints. Available in quart and gallon sizes.

Sea Sponge Roller (SS1030)

This 6" natural sea sponge roller creates a simple and quick decorative finish.

Metallic Paint Collection Color Card

To fully appreciate the full range of metallic colors you need to view the actual product. It's easy to order a Metallic Paint Collection Color Card, just call 1-800-942-3166 or go to modernmasters.com.

Coverage Characteristics

Colors in the Metallic Paint Collection contain three levels of coverage/hide: Opaque, Semi-Opaque and Sheer. Opaque colors have excellent hide; two coats are recommended for best results. Semi-Opaque colors have good hide; three coats are recommended for best results. Sheer colors are translucent overcoats that give luster to traditional paints, other Metallic Paint colors or faux and broken color finishes. Check the label on the container for the coverage level. Metallic Paint covers approximately 320-400 sq. ft./gallon. Available in 6 ounce, quart and gallon sizes.

■ Opaque - 2 coats for coverage

● Semi-opaque - 3 coats for coverage

◆ Sheer - translucent overcoat
