

# Silicone Moisture Barrier 70-198

## EASY FLOORING INSTALLATIONS

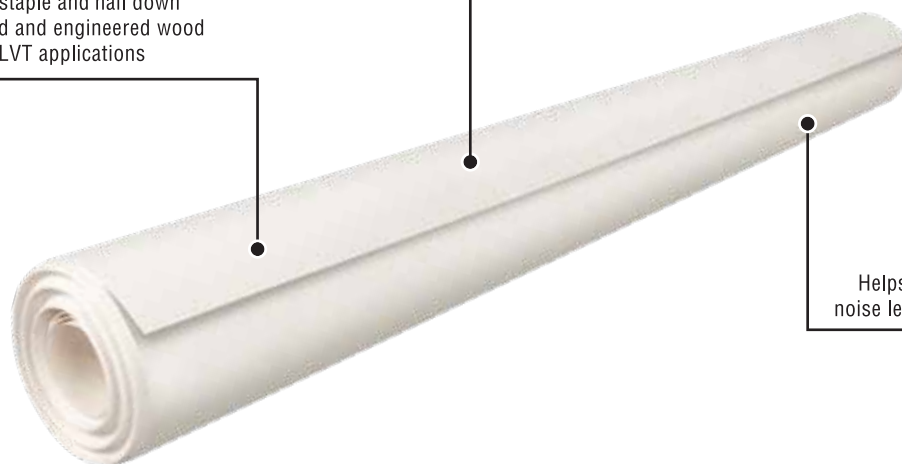

Recommended for staple and nail down installations of solid and engineered wood floors and floating LVT applications

## MOISTURE BARRIER

Reduces vapor flow without trapping moisture

## LESS MESS

Helps reduce dust and noise levels, clean to use

Silicone Moisture Barrier is an underlayment with a silicone coating that will prevent moisture from penetrating finished flooring planks. The smooth surface side allows installers to easily slide planks during install, allowing for a fast installation process.

Silicone Moisture Barrier is made from repurposed paper and 100% recycled materials that are environmentally safe and do not contain any toxic tar or tar-based materials found in some underlayments. The white paper will not leave black residue on hands or walls and allows for a more visible chalk line. It also does not fall apart during installation like red rosin, kraft and wax papers can.

Meets the perm ratings recommended by the *Natural Wood Flooring Association (NWFA)*.

## SPECIFICATIONS

ITEM #	70-198
UNIT OF MEASURE	EACH
COVERAGE	200 sq ft
WIDTH OF ROLL	31.5"
LENGTH OF ROLL	76.25 ft
THICKNESS	6mil (0.006")

## FEATURES & BENEFITS

- Provides moisture barrier
- Suitable for use on radiant flooring
- No asphalt odor
- Clearly visible chalk lines
- No residue on hands or walls
- Free of toxic chemicals
