

What is ProWood® railing made of?

- ProWood railing is typically made from pressure-treated SYP, cedar or redwood, designed for durability and resistance to rot, decay, and termites. Some styles may incorporate metal baluster components.

Is ProWood railing suitable for outdoor use?

- Yes, ProWood railing is pressure-treated for outdoor use and is ideal for decks, porches, and other exterior applications.

Can I install ProWood railing myself?

- Yes, ProWood railing is designed for easy installation with standard tools.

Does ProWood railing require painting or staining?

- While not required, painting or staining can enhance appearance and longevity. Allow the wood to dry thoroughly before applying any finish.

How do I clean ProWood railing?

- Use mild soap and water with a soft brush. Avoid harsh chemicals or pressure washing, which can damage the wood.

Is ProWood railing safe for children and pets?

- Yes, when properly installed and maintained, ProWood railing is safe for residential use. Always ensure railings meet local building codes.

Are different styles and colors available?

- ProWood offers various railing styles and finishes. Availability may vary by retailer, so check with your local supplier.

Can ProWood railing be used with other decking materials?

- Yes, ProWood railing can complement wood, composite, or PVC decking systems.

How do I care for the railing over time?

- With all wood products, consistent maintenance is necessary to maintain the desired look. You can stain or seal the wood as needed.
