

APPLICATION

Apply Wet & Forget Outdoor with a garden sprayer. Dilute 1 part Wet & Forget Outdoor to 5 parts water.

Wet & Forget Outdoor Concentrate	Fill Garden Sprayer With Water To
2 1/2 cups (20 oz.)	1 gallon mark
5 cups (40 oz.)	2 gallon mark

TIPS

Apply Wet & Forget Outdoor to a dry surface. Saturate the surface completely with Wet & Forget Outdoor to remove moss, mold, mildew & algae stains. For best results, apply Wet & Forget Outdoor on a cool dry day with no chance of rain for four to five hours after application- morning is best. This will ensure that the surface being treated stays wet for an extended period while Wet & Forget Outdoor begins breaking down the growth. Vertical surfaces that don't have good exposure to the elements might require some assistance using either a water hose or a light brushing. If an area is particularly bad, apply Wet & Forget again approximately one month after the first application.

After the stains have disappeared, use Wet & Forget Outdoor as a maintenance tool. Re-apply at the first sign of new growth to keep stains from coming back. No scrubbing necessary—just apply and forget it!

Treating Moss: To get rid of moss, completely saturate the moss making sure Wet & Forget soaks through and comes in contact with the surface beneath the moss. Over the next few days or weeks, you'll notice the moss turning brown, curling up and detaching from the surface. The wind and rain will help wash away any remaining moss.
