

Pothos

Pothos is a popular, versatile, and easy indoor plant that you can grow in a variety of containers and is well suited for hanging baskets. Pothos is hardy and does not require too much water or light to thrive indoors.

Light: Low – Medium

Watering Requirements: Once per Week

Growing Tips:

Pothos does not require too much special care as it can tolerate low light for long periods. Pothos does prefer moist soil, so water it when the top of the soil is dry. Fertilize every six months.

Pests & Problems: None
