

FAUCET

NIKLES CONTROL HANDLE

With the ergonomic control handle you control your suitable water temperature. Every handle is tested for sturdiness to avoid loose and shaky operation during its lifespan.

APPROVED MATERIALS

Nikles Faucets are designed with safety in mind. Water pass through only approved material in according with worldwide water regulations. No contamination of lead and nickel in water.

HIGH PERFORMANCE CARTRIDGE

The 35 mm ceramic cartridge ensures high performance in low- and high-pressure conditions. The longevity is tested in a 500'000-cycle test and the ceramic disks brush away any debris between the disk for smooth handle operation at all times.

THERMO INSULATION

Insulated body prevent scalding and accumulation of residues. This saves you much cleaning time and the use of harsh chemicals.

Nikles Faucets are available in various finishes. Check the complete range on www.nikles.com
