

# LED LAMP

## SPECIFICATIONS

Grow better, stronger plants with the Feit Electric BR30ADJ/GRW/LED/HDRP Non-Dimmable BR30 LED Plant Grow Light. Rated for high humidity use, it is ideal for all phases of indoor plant growth in soil or hydroponic gardens. With its adjustable spectrum, you can switch color spectrums to match the plants growth stage and increase overall yield, from blue or white spectrum for leaf and vegetative growth, to red spectrum for flowering and budding or Red/White/Blue combination for a good general setting for all plants. Our grow bulbs emit more light in the useful 449nm blue and 630nm red spectrum than regular white LED bulbs and emit spectrum wavelengths and color for better photosynthetic response. They offer instant-on, full brightness and low heat emission, with a PAR value of 14nm. Cooler running LED lights allow you to place them closer to plants without fear of leaf burn. BR30 LED Plant Grow Lights use only 9 watts of energy and have an average life of 15,000 hours/13.7 years. They have an estimated annual energy cost of only \$1.08/year. These LED grow lights are adjustable, allowing you to choose a spectrum depending on the growth stage of your plants. Choose a dependable general purpose grow light for your growing needs. Never worry about lack of sunlight or season changes again. Grow anywhere, year-round.

### Ideal For

#### Horticulture Lighting

### Benefits

- 9-watt bulb, with energy saving LED, perfect for hydroponic and soil growth
- 449nm blue and 630nm red spectrum adjustable LED grow light for all stages of growth, PAR of 14nm
- Cooler Lamp Operation Retains Moisture and Prevents Plant Burn
- 15,000 Hrs./13.7 avg life years, and only \$1.08/year energy cost (based on 3 hrs. daily use)
- Rated for humidity
