

Delta Shower Door Measurement Guide

Choosing the right Shower Door is as easy as 1-2-3. But before you customize your dream door, you need to make sure you have the correct measurements.

- **Identify Vertical and Horizontal Openings**

Height (A) and Widths (B).

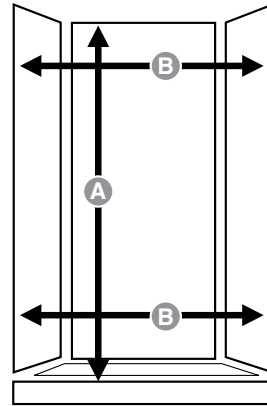

- **Vertical Opening**

Measure from the top of the tub apron or the top of the threshold up to the top of the acrylic (or tile) surround wall.

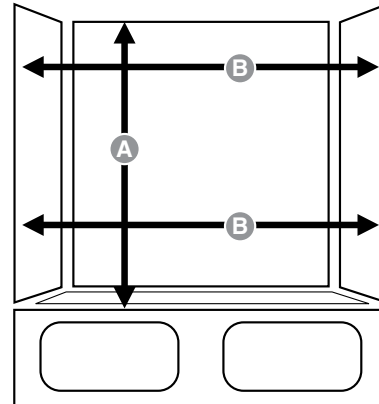

- **Horizontal Opening**

Measure width of opening at the top and the bottom of the enclosure.

Pivoting Shower Doors

Sliding Tub Doors

RECORD DIMENSIONS BELOW

	Opening
Height (A):	
Width of widest point (B):	

**Disclaimers

- For ceramic tile application, use the top of the tile for the maximum door height.
- In older homes the opening at the top is often wider than the bottom due to an out-of-plumb condition.
- NOTE: All Delta Shower Doors are designed to accommodate out-of-plumb conditions totaling 3/8".
