my ecoTM WORLD

For Love of Pets and Planet

Clearing up after our pets means we can all enjoy a healthier planet for millions of dog years to come.

At MyEcoWorld we see a world where regular plastic bags are no longer used to pick up pet poop. That's why we make our bags with at least 30% GMO-free corn, and other non-harmful ingredients.

Because at MyEcoWorld we love the ground your pet walks on.

LOVE
THE
GROUND
YOUR
PET
WALKS
ON

myeco[™] WORLD F.A.Q.

WHAT IS BIOPLASTIC?

Our patented bioplastic is not regular old plastic. It's the good kind and it's made from plants & other renewable materials.

ARE YOUR PET POOP BAGS COMPOSTABLE?

Our empty bags are compostable. Which means that they will not exist in, or damage our soil for generations to come. But when you put poop in our bags, you are no longer able to dispose of them in industrial compost systems. Because of the poop, of course. But it's still a whole lot better than regular plastic. Which means, a whole lot better for our planet.

WHY CAN'T I COMPOST MY POOP BAG WITH THE POOP?

You can compost dog poop, however, you cannot use it to create soil that will be used for vegetation, which is where industrial compost waste can end up. Mostly, it's because of parasites and bacteria that live in dog waste. You can, however, compost the bag with dog poop if yo u're using it to fertilize greenery like trees or non edible plants.

HOW LONG DOES IT TAKE FOR YOUR COMPOSTABLE BAGS TO BREAK DOWN?

Our compostable bags take 12 months to break down in home, municipal, and commercial composts . Compare that to 20 years for a comparable, conventional plastic bag.

WILL MyEcoWorld® BAGS WORK AS REGULAR PLASTIC BAGS?

Glad you asked! Not only will they work, they work quite well. They are very durable and can hold all the things you might use a conventional plastic bag for. Of course, what you put in them has a direct effect on their compostability so please keep that in mind. Stay eco!
