

GRACE

Ice & Water Shield® HT

Roofing Underlayment

Meets The Challenges Inherent in Metal Roofs

Delivers optimal balance of adhesion & thermal stability for superior performance under the most demanding conditions

Protects roofs against wind driven rain and ice dams

The design flexibility you need, the waterproofing performance you trust

Grace® Ice & Water Shield® HT fully-adhered, smooth surface roofing underlayment is specifically designed to meet the challenges inherent in metal roof assemblies. It delivers all the advantages of Grace Ice and Water Shield® roofing underlayment with thermal stability up to 260°F.

“Grace underlayments are far superior to any products we have used in the past. When applied properly they perform flawlessly. They adhere very well to roof decks and seal each and every nail penetration unlike many other products we have used in the past. We use Grace Ice & Water Shield® HT under all of our slate roof applications. Since 1989, we have been using Grace underlayments, and we are highly satisfied with their products. In the event of a roofing failure (snow and ice, hurricane, tree damage, etc.) we feel confident having Grace underlayments on our clients’ homes and would trust no other product. Do it right the first time.”

— Kevin Menezes, Triple M Contracting Inc.

Why **GRACE ICE & WATER SHIELD® HT** Roofing Underlayment?

Developed by Grace

Premium protection
you expect from **Grace
Ice and Water Shield®**
roofing underlayment
with the thermal
stability metal roofs
require

Temperature resistance up to 260°F—

Perfect option for high temperature roof designs such as metal roofs

Premium waterproofing for metal roofs

120 day exposure—

Membrane delivers consistent performance over long, unpredictable construction cycles

Flexible construction schedules

High quality seal around fasteners—

Premium roof leak protection

Peace of mind against costly call backs

Superior adhesion—

Helps ensure watertight seal

Protection from harsh weather conditions

Strong lap strength—

Minimizes chances of leaks due to gaps

Vulnerable lap areas are protected

Roll Coverage	225 ft ² 200 ft ²
---------------	--

Temp. Resistance	260° F
------------------	--------

Exposure Time	120 days
