

CARE & CLEANING TIPS

Thank you for purchasing our products. Before using this product, please wipe up the wicker/rattan with a clean, wet cloth/towel. Here are some useful suggestions for how to maintain the product:

1. Keep your furniture covered

Both in and out of season, we suggest that you keep your furniture covered when not in use. You can also reduce exposure to direct sunlight by storing your furniture in a covered area. This will minimize fading and can double the life of your furniture.

2. Cushion covers are made with water-resistant coating, but they can't stand heavy rain or much pouring water/ other liquid staying on it for an extended period. So please keep cushions inside for rainy days and quickly dry the cover surface once there is water/liquid on it.

3. Please use mild detergent and water for normal cleaning. Do not use bleach or other solvents.

4. For cushion covers, we do not recommend for frequent washing or machine washing, because both ways will damage the UV protection coating of the cover. Hand-wash with mild detergent is firstly recommended in order to protect the coating.

5. Please use a soft, clean cloth or towel to wipe up glass table top.

For any questions, please contact our customer service freely. Email: angela_qimark@163.com. We are always here to help.
