COMPATIBLE CHEMICALS LIST:

WARNING

READ OPERATOR'S MANUAL BEFORE USING APPLIANCE. THESE INSTRUCTIONS ARE NOT A SUBSTITUTE FOR THE OPERATOR'S MANUAL.

COMPATIBLE CHEMICALS

- The RYOBI P2870 and P2890 Electrostatic Sprayer is compatible for use with most water-soluble chemicals. For a list of compatible chemicals, please refer to the Compatible Chemicals List below.
- Compatible Chemicals are those that will not damage or degrade the device itself when used according to the operator's manual.
- The inclusion of a chemical on the Compatible Chemicals List below does not represent or warrant the suitability of any chemical for your intended application.
- Please periodically check the Compatible Chemical List QR code for the most updated sheet.

USER RESPONSIBILITY

- Before using any chemical, please refer to the chemical manufacturer's label or EPA website to verify it has been approved for battery powered and electrostatic sprayer application.
- Always refer to the chemical manufacturer's label to confirm a chemical's suitability for your intended application.
- Never use bleach, alcohol-based chemicals, chlorine, hypochlorous acid, or hydrogen peroxide.
- Never use tablets, powder, or abrasive chemicals.
- Never combine chemicals.
- To ensure a chemical is approved for your intended use, refer to the chemical manufacturer's label, user instructions, and the applicable government agency with jurisdiction over the production and distribution of the chemical. The manufacturer and distributor of the RYOBI P2870 and P2890 DO NOT develop, manufacture, or distribute any chemicals.
