

Use And Care Manual

Need to pay attention when using

1. Do not put too many items, so as not to affect the compression effect.
2. Do not store and compress sharp objects, corrosive objects and flammable objects, otherwise this will reduce the service life of the vacuum storage bags.
3. If you find that the product is leaking when using it for the first time, please try to repack it and check whether the zipper is properly sealed. If the air leak still occurs after repeated attempts, please contact us and we will provide a reasonable solution.
4. In the process of using the vacuum compression bag, please do not violently tear or twist it.
5. Vacuum compression bags can be reused many times, and you can store them in a suitable place when you are not using them.

Need to pay attention when storing

1. Please store the product in a dry place, avoid direct sunlight and high temperature.
2. Please do not place the product next to sharp objects to avoid scratching the surface of the storage bag. Once the surface of the product is damaged, its compression effect cannot be the same as before.
