

Care Instructions

Well Woven rugs are made with top quality materials and methods, however, rugs, like anything, require care and maintenance to keep them in great shape.

- Regular Vacuuming.
- Spot Cleaning recommended. If you spill on a rug, clean it immediately. Once the stain is set in it becomes more difficult to clean. Never rub a spill as it forces the spill deeper into the rug. Blot with a clean white cloth.
- Soiled areas should be cleaned immediately with a mild detergent. With a dry towel, blot stain; mix dish soap with water and gently remove the remainder of the stain.
- Wear: Rotate rugs every 3-6 month due to traffic.
- Do not machine wash.
- Do not bleach.

Use: Recommended for indoor use only
