PREMIER

Everything you need to start running your tubes!

After concrete pour using Premier and Straight.

The **Premier** product is all you need to make your routing quick and easy. Designed for 1/2" or 5/8" tubes in unison. 3/4" and 1" in a single channel. Shipped as a 6 or 12 channel system. Simply cut down to your job specifications.

Package Contents: 6 or 12 Channel EZ Route Premier, 8" pole barn spikes, I/O sheet

RADIUS

The **Radius** product is sold by itself. If you have access to supporting and installation materials, then this will be a good, economical choice to make your 90° turns easy and organized.

Package Contents: 6 or 12 Channel EZ Route Radius, I/O sheet

STRAIGHT

The **Straight** product is an add-on accessory that can be used with the Premier or the Radius, keeping your tubes directed upward and straight. This allows for easy labeling as well as keeping the tubes out of the way of the masons. This will save time, money and hassle.

Package Contents: 6 or 12 Channel EZ Route Straight, I/O sheet
