SUNHEATER
LIQUID HEAT SHIELD

Your pool can lose inches of water per week through evaporation. Adding SunHeater Liquid Heat Shield to your weekly maintenance will help save water, heat and chemical use by reducing evaporation.

SunHeater Liquid Heat Shield forms a microscopically thin, invisible, odor-free, non-toxic barrier on top of your pool water. Liquid Heat Shield will not affect or be affected by automatic cleaners, swimmers, or any other surface disturbances.

Directions:

- 1) Ensure your pool's filter system is running.
- 2) Shake the bottle vigorously for 30 seconds.
- 3) Pour 4 oz of Liquid Heat Shield for every 20,000 gallons of pool water (18' x 36' rectangular or 28' round pool) directly into skimmer.

NOTE: It is important to have the filter running during application in order to properly circulate Liquid Heat Shield.

Try SunHeater Solar Heating Panels for Inground and Aboveground Pools!

- Enjoy **FREE** Heat from the Sun!
- Increases Pool Temperatures up to 15°F!
- Easily Installs Using Existing Filtration System!
- 5-Year Limited Warranty!
