ASSEMBLY INSTRUCTIONS

Step 1: Attach the Support Pole

-

Slide the pole sections together in order (bottom to top).

-
-

Align the holes and secure them with bolts and washers.

-

Step 2: Install the Base

-

Insert the pole into the base.

-
-

Attach the base to the pole using the provided fasteners.

-
-

Make sure the base is securely fastened and level.

-

Step 3: Mount the Backboard and Rim

-

Attach the rim to the backboard using the supplied bolts.

-
-

Secure the backboard to the top of the pole.

-
-

Double-check all fasteners for tightness.

-

Step 4: Connect the Height Adjustment Mechanism

-

Attach the mechanism between the backboard bracket and the support pole.

-
-

Test the adjustment lever to ensure smooth movement.

-

Step 5: Add Wheels (if applicable)

-

Attach the wheels to the bottom rear of the base using the provided hardware.

-

Step 6: Fill the Base

-

Fill the base with sand or water for stability (sand is recommended for cold climates).

-
-

Do not move the unit until the base is fully filled.

-

MAINTENANCE TIPS

-

Check bolts monthly for tightness.

-
-

Store the unit indoors during extreme weather if possible.

-
-

Use mild detergent to clean backboard and base.

-
-
