Product Guide

Sustainability

Not just a good thing, it's the right thing.

Aspen Flooring believes it is our responsibility to help make this planet a better place – for our customers, our employees, our communities, and all the other living creatures we share it with. That's why our flooring is created to not only minimize our carbon footprint and impact on the environment, but to also foster a deeper appreciation for the beauty of the natural world.

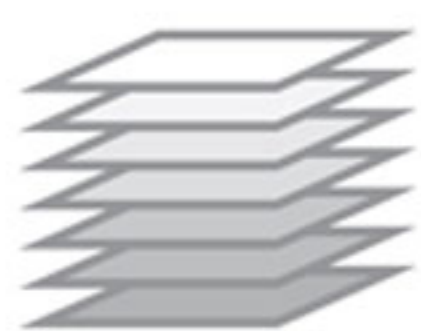

Aspen hardwood flooring is the perfect flooring solution for almost every room in your home.

While other types of floors can wear out quickly or go out of style, our hardwood flooring planks are sandable and refinishable making it the ideal lifetime floor covering. We offer a variety of finishes to choose from. All Aspen hardwood flooring products include a lifetime residential finish and structural warranty.

Cleaning is a breeze with Aspen hardwood flooring because it is hypoallergenic, sanitary and easy to keep clean with approved cleaning products. Aspen real hardwood flooring is FloorScore and CARB Phase 2 certified for indoor air quality. Our products are sustainable and recyclable, being a natural product that is managed via renewable forestry stewardship.
