# HERE'S HOW TO TAKE CARE OF ME

# Bonsai

## LIGHT

This plant loves direct sunlight. Place it by a window or on a porch that gets direct, natural light for at least a portion of the day.

## WATER

This plant can only go 1-2 weeks without water so check on it weekly and add water every time the top two inches of soil dry out.

## FOOD

Feed me once or twice a year during Spring and Summer with a fertilizer formulated for houseplants.

## FEATURES

The most thing to know about bonsai is that it's not a type of plant, but instead, a way of treating a plant.

## GROWING TIPS

Bonsai does require yearly pruning to keep it in shape and from outgrowing its container. When shaping, don't forget to prune the roots as well as the shoots, to keep it from becoming rootbound.

## GIVE ME FRIENDS

(I play well with)

Succulents, Alocasia, Pilea
