HOMEDEPOT.COM/HOMEDECORATORS

THANK YOU
We appreciate the trust and confidence you have placed in Home Decorators Collection through the purchase of this ceiling fan. We strive to continually create quality products designed to enhance your home. Visit us online to see our full line of products available for your home improvement needs. Thank you for choosing Home Decorators Collection!

Table of Contents

Safety Information

1. To reduce the risk of electric shock, ensure electricity has been turned off at the circuit breaker or fuse box before beginning.

2. All wiring must be in accordance with the National Electrical Code "ANSI/NFPA 70-1999" and local electrical codes. Electrical installation should be performed by a qualified licensed electrician.

3. The outlet box and support structure must be securely mounted and capable of reliably supporting a minimum of 35 lbs (15.9 kg). Use only UL-listed outlet boxes marked "FOR FAN SUPPORT."

4. The fan must be mounted with a minimum of 7 ft. clearance from the trailing edge of the blades to the floor.

5. Avoid placing objects in the path of the blades.

6. To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.

7. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.

8. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and ungrounded conductor on the other side of the outlet box.

9. All setscrews must be checked and retightened where necessary before installation.

10. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

    Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

    NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: To reduce the risk of electrical shock or fire, do not use this fan with any solid-state fan speed control device. It will permanently damage the electronic circuitry.

WARNING: To reduce the risk of personal injury, do not bend the blade arms (also referred to as flanges), when installing the brackets, balancing the blades or cleaning the fan.

WARNING: Do not insert foreign objects between rotating fan blades.

WARNING: To reduce the risk of fire, electric shock or personal injury, mount the fan to the outlet box marked acceptable for fan support with the screws provided with the outlet box.

CAUTION: To reduce the risk of personal injury, use only the screws provided with the outlet box.

NOTICE: This fan includes a 75W limiter to comply with the Department of Energy 2009 regulation. Lamping this product over 75W will cause this fan not to light. Please use bulbs with a total wattage under the 75W regulation.

Warranty

We warrant the fan motor to be free from defects in workmanship and material present at time of shipment from the factory for a period of lifetime after the date of purchase by the original purchaser. We also warrant that all other fan parts, excluding any glass or acrylic blades, to be free from defects in workmanship and material at the time of shipment from the factory for a period of two years after the date of purchase by the original purchaser. We agree to correct such defects without charge or at our option replace with a comparable or superior model if the product is returned. To obtain warranty service, you must present a copy of the receipt as proof of purchase. All costs of removing and reinstalling the product are your responsibility. Damage to any part such as by accident, misuse, improper installation or by affixing any accessories, is not covered by this warranty. Because of varying climatic conditions this warranty does not cover any changes in brass finish, including rusting, pitting, corroding, tarnishing or peeling. Brass finishes of this type give their longest useful life when protected from varying weather conditions. A certain amount of "wobble" is normal and should not be considered a defect. Servicing performed by unauthorized persons shall render the warranty invalid. There is no other express warranty. We hereby disclaim any and all warranties, including but not limited to those of merchantability and fitness for a particular purpose to the extent permitted by law. The duration of any implied warranty which cannot be disclaimed is limited to the time period as specified in the express warranty. Some states do not allow limitation on how long an implied warranty lasts, so the above limitation may not apply to you. The retailer shall not be liable for incidental, consequential, or special damages arising out of or in connection with product use or performance except as may otherwise be accorded by law. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion or limitation may not apply to you. This warranty gives specific legal rights, and you may also have other rights which vary from state to state. This warranty supersedes all prior warranties. Shipping costs for any return of product as part of a claim on the warranty must be paid by the customer.

Contact the Customer Service Team at 1-800-986-3460 or visit www.HOMEDEPOT.COM/HOMEDECORATORS

Pre-Installation

SPECIFICATIONS

Fan size	Speed	Volts	Amps	Watts	RPM	CFM	N.W.	G.W.	C.F.
52 in.	Low	120	0.28	13.14	61	1723	13.38 kg (29.44 lbs.)	15.59 kg (34.30 lbs.)	3.35 cu. ft.
	Medium		0.48	37.79	125	3794			
	High		0.68	80.55	189	5823			

NOTE: These are approximate measures. They do not include amps and wattage used by the light kit.

O	Receiver	1
P	Remote control	1
Q	Remote control holder	1

Installation

MOUNTING OPTIONS

WARNING: To reduce the risk of fire, electric shock, or personal injury, mount the fan to an outlet box marked acceptable for fan support using the screws provided with the outlet box. An outlet box commonly used for the support of lighting fixtures may not be acceptable for fan support and may need to be replaced. If in doubt, consult a qualified electrician.
NOTE: You may need a longer downrod to maintain proper blade clearance when installing on a steep, sloped ceiling. The maximum angle allowable is 18° away from horizontal. If the canopy (B) touches the hanger ball/downrod assembly (D), then remove the decorative canopy bottom cover (C) and turn the canopy (B) 180° before attaching the canopy (B) to the mounting bracket (A).

If your ceiling fan does not have an existing UL-listed mounting box, then install one using the following instructions:

☐ Disconnect the power by removing the fuses or turning off the circuit breakers.

☐ Secure the outlet box (TT) (not included) directly to the building structure. Use appropriate fasteners and materials (not included). The outlet box and its bracing must be able to fully support the weight of the moving fan (at least 35 lbs.). Do not use a plastic outlet box.

The illustrations below show three different ways to mount the outlet box (TT) (not included).

To hang your fan where there is an existing fixture but no ceiling joist, you may need an installation hanger bar (UU) (not included) as shown above.
Assembly

1 Preparing the canopy

□ Remove the canopy ring (B) from the canopy (C).

□ Remove the two non-slotted mounting bracket screws (BB) from the canopy (C), and loosen the slotted mounting bracket screws (BB) on the canopy (C).

□ Remove the canopy (C) from the mounting bracket (A) by turning the canopy (C) counterclockwise.

2 Preparing the motor

□ Remove the cotter pin (HH) and clevis pin (GG), and loosen the two collar setscrews (KK) from the motor collar.

□ Take out the setscrew (JJ) located in the hanger ball (VV), lower the hanger ball and remove the cross pin (II). Remove the hanger ball (VV) from the hanger ball/downrod assembly (D).

□ Remove the ground lead (WW) from the downrod assembly (D).
3 Assembling the fan

⚠ **WARNING:** Failure to properly install the cotter pin (HH) could result in the fan loosening and possibly falling.

NOTE: If a longer downrod (not included) is needed, take out the screw located in the hanger ball (VV), lower the hanger ball (VV) and remove the pin (II). Remove all three pieces from the downrod and assemble them onto the new longer downrod before proceeding to the downrod installation.

□ Carefully feed the motor wires up through the downrod (XX). Thread the downrod (XX) into the collar.

□ Align the holes and replace the clevis pin (GG) and cotter pin (HH). Tighten the two collar setscrews (KK).

□ Slip coupling cover (G), scroll holder (E), canopy ring (B), and canopy (C) onto the downrod (XX). Place scroll arm (F) over the scroll holder (E) making sure the tab (YY) is properly aligned to the slot (ZZ) on the motor housing. Secure with the scroll arm screw (LL) by using the hex wrench (RR) provided. Repeat this process to attach the other two scroll arms (F).

□ Carefully reinstall the hanger ball (VV) onto the downrod (XX) and reinstall the ground lead (WW) onto the downrod (XX), being sure that the cross pin (II) is in the correct position, the setscrew (JJ) is tightened and wires are not twisted.
Assembly — Hanging the Fan

4 Installing the mounting bracket to the electrical box

⚠ **WARNING:** To reduce the risk of fire, electric shock or other personal injury, mount the fan only to an outlet box or supporting system marked acceptable for fan support and use the mounting screws provided with the outlet box.

☐ Pass the 120-volt supply wires through the center hole in the mounting bracket (A).

☐ Attach the mounting bracket (A) on the outlet box (TT) by sliding the mounting bracket (A) over the screws provided with the outlet box (TT). Note that the flat side of the mounting bracket (A) is toward the outlet box (TT).

☐ Securely tighten the two mounting screws.

TT

A

5 Hanging the fan to the mounting bracket

⚠ **WARNING:** The tab in the ring must rest in the groove of the hanger ball/downrod assembly (D). Failure to properly seat the tab in the groove could cause damage to the wiring.

☐ Carefully lift the fan motor assembly (H) up to the mounting bracket (A) and seat the hanger ball/downrod assembly (D) in the mounting bracket (A) socket. Make sure the tab on the mounting bracket (A) socket is properly seated in the groove in the hanger ball/downrod assembly (D). This will help to balance the ceiling fan.

A

D

H

6 Preparing the receiver and remote control

⚠ **WARNING:** To avoid possible electrical shock, be sure electricity is turned off at the main fuse box before wiring.
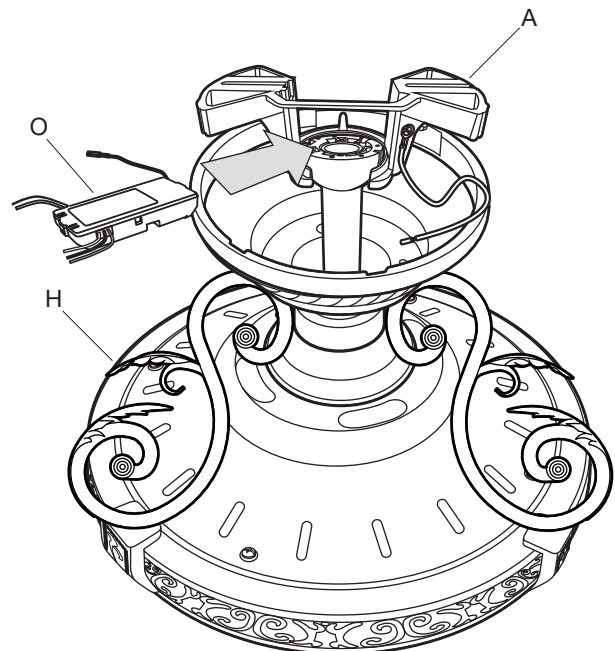

⚠ **CAUTION:** Do not use with a wall light dimmer switch.

If you feel you do not have enough electrical wiring knowledge or experience, have your fan installed by a licensed electrician.

This remote control unit is equipped with 16 code combinations to prevent possible interference from or to other remote units. The frequency switches on your receiver (O) and remote control (P) have been preset at the factory. Please recheck to make sure the switches on the remote control (P) and the receiver (O) are set to the same position. Any combination of settings will operate the fan as long as the switches in the remote control (P) and receiver (O) are set to the same position.

☐ After checking the switches, insert the receiver (O) into the mounting bracket (A) with the flat side of the receiver (O) facing the ceiling.

7 Making the electrical connections

WARNING: Check to see that all connections are tight, including ground, and that no bare wire is visible at the wire nuts, except for the ground wire.

CAUTION: Do not use with a wall light dimmer switch.

NOTE: The fan must be installed at a maximum distance of 20 ft. from the remote control for proper signal transmission between the remote control and the fan's receiving unit.

Follow the steps below to connect the fan to your household wiring. Use the plastic wire nuts (AA) with your fan. Secure the plastic wire nuts (AA) with electrical tape. Make sure there are no loose strands or connections.
Motor to receiver electrical connections:
- Connect the black wire from the fan to the black wire marked "TO MOTOR L" from the receiver (O).

- Connect the white wire from the fan to the white wire marked "TO MOTOR N" from the receiver (O).

- Connect the blue wire from the fan to the blue wire marked "For Light" from the receiver (O).

Receiver to house supply wires electrical connections:
- Connect the black (hot) wire from the ceiling to the black wire marked "AC in L" from the receiver (O).

- Connect the white (neutral) wire from the ceiling to the white wire marked "AC in N" from the receiver (O).

- If your outlet box (TT) has a ground wire (green or bare copper) connect it to the fan ground wires; otherwise connect the hanger ball/downrod assembly (D) ground wire to the mounting bracket (A).

- Secure each wire connection with a plastic wire nut (AA) provided with the electrical hardware.

- After connecting the wires, spread them apart so that the green and white wires are on one side of the outlet box (TT) and the black and blue wires are on the other side. Carefully tuck the wire connections up into the outlet box (TT).
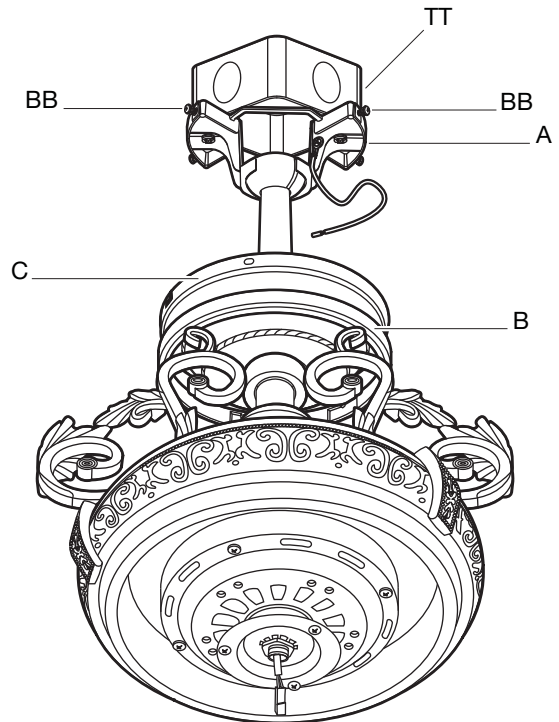

8 Installing the canopy

> ⚠ **WARNING:** Make sure the tab on the mounting bracket (A) properly sits in the groove in the hanger ball/downrod assembly (D) before attaching the canopy (C) to the mounting bracket (A) by turning the canopy (C) until it drops into place.

> ⚠ **WARNING:** The locking slots of the canopy (C) are provided only as an aid to mounting. Do not leave the fan assembly unattended until all four canopy mounting bracket screws (BB) are engaged and firmly tightened.
☐ Slide the canopy (C) up to the ceiling. Make sure you have placed the wires safely into the outlet box (TT).

☐ Secure the canopy (C) to the mounting bracket (A) with the four canopy mounting bracket screws and lock washers (BB) included with your fan.

☐ Raise up canopy ring (B) and line up the four tabs with the four grooves on the canopy (C). Once lined up, slide the canopy ring (B) and secure it to the canopy (C) until snug.

9 Attaching the blades to the blade arms

☐ Attach the blades (J) to the blade arms (K) using the three blade attachment screws and rubber washers (CC) and the medallions (I). Start a screw and rubber washer (CC) into a medallion (I), but do not tighten.

☐ Repeat for the two remaining blade attachment screws and rubber washers (CC).

☐ Tighten each screw securely starting with the center screw. Make sure the blade (J) is straight.
☐ Repeat these steps for the remaining blades (J).

10 Fastening the blade assemblies to the motor

⚠ **WARNING:** To reduce the risk of personal injury, do not bend the blade arms (K) while installing, balancing the blades (J), or cleaning the fan. Do not insert foreign objects between rotating fan blades (J).
☐ Align the holes from the blade arm (K) to the holes from the motor (H), and secure the blade arm in place with screws and washers (DD) provided.

☐ Repeat this process to attach the other blades (J).

13

Please contact 1-800-986-3460 for further assistance.

Assembly — Installing the Light Kit

11 Attaching the light kit mounting plate to the mounting ring

☐ Remove one of the three light kit mounting plate screws (MM) from the mounting ring (AAA) and loosen the other two screws. (Do not remove.)

☐ Place the key holes in the light kit mounting plate (L) over the two screws (MM) previously loosened from the mounting ring (AAA). Turn the light kit mounting plate (L) until the light kit mounting plate (L) locks in place at the narrow section of the key holes.

☐ Securely tighten the two light kit mounting plate screws (MM) previously loosened and the one (MM) previously removed.
12 Attaching the LED light kit and glass shade

⚠️ **CAUTION:** Before starting installation, disconnect the power by turning off the circuit breaker or removing the fuse at the fuse box. Turning power off using the fan switch is not sufficient to prevent electric shock.

☐ Remove one of the three light kit mounting screws (NN) from the light kit mounting plate (L) and loosen the other two screws (NN). (Do not remove.)

☐ While holding the 28W LED light kit (M) under the fan motor assembly (H), make the 2-pin wire connections:
- Red to white
- Black to black

☐ Place the key holes in the 28W LED light kit (M) over the two mounting screws (NN) previously loosened from the light kit mounting plate (L). Turn the 28W LED light kit (M) until the 28W LED light kit (M) locks in place at the narrow section of the key holes. Secure by tightening the two light kit mounting screws (NN) previously loosened and the one (NN) previously removed.

☐ Place the glass shade (N) over the 28W LED light kit (M) stem and secure with the plastic nut (PP) (rubber side on the top) and decorative nut (QQ) provided. Do not overtighten.

Operation

## REMOTE CONTROL OPERATING INSTRUCTIONS

☐   Install the 12V MN21/A23 battery (OO) (included) into the remote control (P). To prevent damage to the remote control (P), remove the battery if not used for long periods.

☐   Restore power to the ceiling fan and test for proper operation.

HI, MED, LOW buttons: Sets the fan speed.

OFF button: Turns the fan off.

☼ button: Turns the light on or off and also controls the brightness setting. Press and release this button to turn the light on or off. Press and hold the button to set the desired brightness. The light button has an auto-resume, it will stay at the same brightness as the last time it was turned off.

↻ button: Set the fan forward or reverse, press the button forward (for warm weather) or reverse (for cool weather)

INSTALLING THE REMOTE CONTROL HOLDER

☐   Remove the two remote control holder plugs (FF) from the remote control holder (Q). Note that the plugs have unique tabs that allow them to fit only in one hole.

☐   Attach the remote control holder (Q) with the two remote control holder mounting screws (EE).

☐   Replace the two remote control holder plugs (FF) each into its own hole.

Operation (continued)
REVERSE SWITCH OPERATING INSTRUCTIONS

Speed settings for warm or cool weather depend on factors such as the room size, ceiling height, number of fans, and so on.

> **NOTE:** To operate the reverse function on this fan, press the for/rev button while the fan is running.

Warm weather - (Counterclockwise Direction) A downward air flow creates a cooling effect. This allows you to set your air conditioner on a warmer setting without affecting your comfort.

Cool weather - (Clockwise Direction) An upward air flow moves warm air off the ceiling. This allows you to set your heating unit on a cooler setting without affecting your comfort.

Care and Cleaning

Do
□ Check the support connections, brackets, and blade attachments twice a year. Make sure they are secure. Because of the fan's natural movement, some connections may become loose over time. It is not necessary to remove the fan from the ceiling.
□ Clean your fan periodically. Use only a soft brush or lint-free cloth to avoid scratching the finish. The plating is sealed with a lacquer to minimize discoloration or tarnishing.
□ (Optional) Apply a light coat of furniture polish to the wood blades.
□ (Optional) Cover small scratches with a light application of shoe polish.

| Do not |
|---|
| □ Use water when cleaning. Water could damage the motor, or the wood, or possibly cause an electrical shock. |
| □ Apply oil to your fan or motor. The motor has permanently-lubricated sealed ball bearings. |

Troubleshooting

> ⚠️ **WARNING:** Make sure the power is off at the electrical panel box before you attempt any repairs. Refer to step 7 "Making the electrical connections" on page 11.

Problem	Solution
The fan will not start.	☐ Check the main and branch circuit fuses or breakers.
	☐ Check the line wire connections to the fan and switch wire connections in the switch housing.
	☐ Check to make sure the dip switches from the remote control and receiver are set to the same frequency.
The fan sounds noisy.	☐ Make sure all motor housing screws are snug.
	☐ Make sure the screws that attach the fan blade arm to the motor hub are tight.
	☐ Make sure wire nut connections are not rattling against each other or the interior wall of the switch housing.
	☐ Allow a 24-hour "breaking-in" period. Most noises associated with a new fan disappear during this time.
	☐ If using the ceiling light kit, make sure the screws securing the glassware are tight. Check that the light bulb is also secure.
	☐ Make sure there is a short distance from the ceiling to the canopy. It should not touch the ceiling.
	☐ Make sure your ceiling box is secure and rubber isolator pads are used between the mounting bracket and outlet box.
Lights shut off and will not come back on.	☐ This unit is equipped with a wattage limiting device. Lamping in excess of 75 watts will disable your ceiling fan's light kit. To reset your light kit, you must turn the power off and relamp, keeping the wattage under 75 watts. Restore power to your ceiling fan and continue normal operation.
The remote control is not working.	☐ Do not connect the fan with wall mounted variable speed control(s).
	☐ Check to make sure the dip switches from the remote control and receiver are set to the same frequency.
The fan wobbles.	☐ Check that all blade and blade arm screws are secure.
	☐ Most fan wobble problems are caused when blade levels are unequal. Check this level by selecting a point on the ceiling above the tip of one of the blades. Measure from a point on the center of each blade to the point on the ceiling. Rotate the fan until the next blade is positioned for measurement. Repeat for each blade. Measurements deviation should be within 1/8 in. Run the fan for 10 minutes.
	☐ Use the enclosed blade balancing kit if the blade wobble is still noticeable.
