

How to Measure Your Room's Square Footage

Measuring the square footage of your space is an important part of buying a window AC (although, it's not the only factor as you'll see).

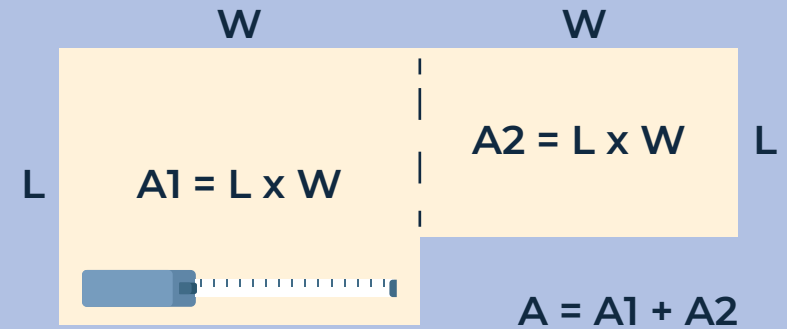

We've outlined the easiest ways to measure sq. ft. to make things a little easier:

$$\text{Sq. ft.} = \text{length} \times \text{width}$$

If you have a tape measure handy:

If you have a weird room configuration:

If you don't have a tape measure:

If you measure your shoe, you can easily walk out the L and W. If your shoe is 12 inches, or around there, each step would be a foot.

You may be able to find your sq ft and floor plan if you google your building/apartment on Streeteasy or similar site.
