SEER19

■ Comfort & Healthy

GW SERIES

Excellent Design

Aesthetic engineers integrate arc curves into panel design to create silky and fresh appearance.

Pearl White Body

Pearl-white body is integrated with home decoration. Thin and elegant appearance show the taste of life.

Elegant Display Panel

VLED display panel, air quality and temp. are easy to check, with soft light and elegant display panel, not dazzling.

■ 3D Airflow

By the vertical and horizontal louver driven by the stepping motors, it achieves a wider air supply angle and longer distance.

■ Self-Cleaning

Evaporator is frosted to freeze the dirt on the fin then starts defrosting to generate a large amount of water to brush away the dirt. After 55°C quick-drying, the evaporator becomes cleaner & more sterile.

■ Ionizer & Plasma

Built in generator of ionizer & plasma helps to sterilization, smoke elimination, dust removal, eliminate odor, greatly improve the air quality.

■ Multi-Function Filter

Multifunctional 4-in-1 filter: purify the air, healthy and comfort.

■ Auto Restart

When power is restored, the unit will automatically run according to the settings before the power failure.

■ Intelligent

■ Self-Diagnosis

When failure happens, the error code will be displayed, and the operation parameters can be queried on the panel through the remote controller.

■ WiFi Control

Remotely control the air conditioner by the built-in wifi module, and can achieve weekly timing, you can control the AC through the phone easily while you are away home..

■ Remote ON/OFF

Room card function: it can meet one-key control requirement of air conditioner switch.

■ Wired Control

Wired control optional, air filter clean reminder available.

Inverter

Power Saving

- Compressor starting frequency is small, low circuit loss, and more power saving
- Automatic frequency switching to reduce frequent start and stop of the system
- In the same time, the energy saving can be up to 36% compared with 14SEER unit

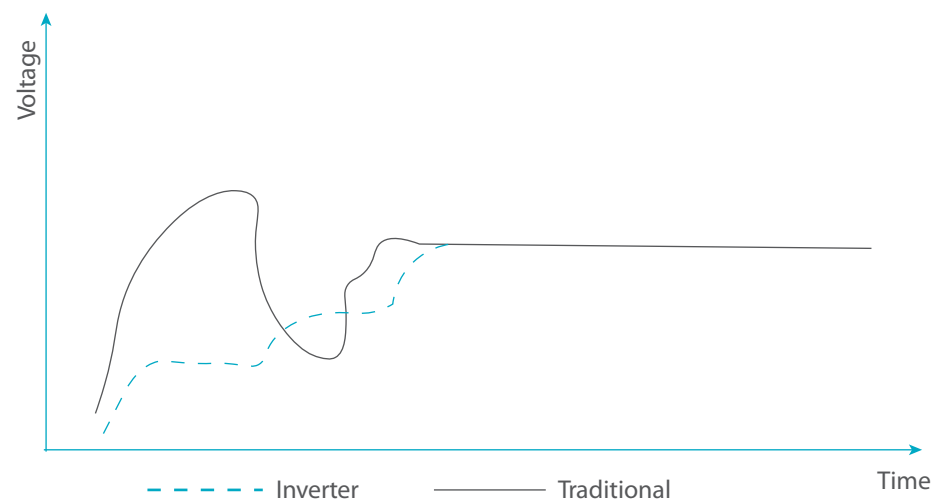

High Operational Reliability

Reasonable frequency conversion, which can make the 4-way valve action pressure difference in a reasonable range, not more than the maximum action pressure difference.

Low Starting Current

- Reducing the impact on the power grid, safer and more reliable.
- Reducing the impact of pulse interference on other household appliances in use in the room.

Controller

Function Icon

Standard

Optional

Err or Alarm Output
When failure happens, the system will send a message to designated terminal receiving equipment.

Louver position memory
The indoor unit will remember the louver position at the time it was turned off. It will set the louver to the same position again when it is initialised.

Dual drainage
Two drainage holes are reserved, you can install drainage pipe left or right according to different project requirements.

Low voltage operation
172V low voltage operation

Emergency button
If a temperature sensor error occurs, the unit will alarm and operate in emergency function mode until replaced.

Remote ON / OFF
Specialised built-in reserved room cards ports, which allow a remote ON/OFF switch to be easily connected.

Auto mode
The air conditioner will auto run different modes according to the difference between the room temperature and the set temperature.

Fireproof E-box
The E-box is made of high fireproof level material, fulfilling meet the safety regulations for the safe operation.

Cooling at 50 °C
Using refrigerant pipeline cooling technology to cool down the electronic control to achieve stable cooling in a 50 high temperature environment.

Cooling at 0 °C
With built-in low ambient kit and a specially designed PCB, the outdoor fan speed is automatically changed according to the condensing temperature, cooling at 0 °C available.

24H timer
The system can be preset to automatically start and stop within 24-hour period.

Self diagnosis
If the failure happens, the error code will be displayed on the panel, you can also check the status by remote controller.

Sleep mode
Lowest wind, for cooling, temperature increases by 1 degree per hour for 2 hours (≤ 30 °C); for heating, decreases by 1 degree per hour for 2 hours (≥ 17 °C); the cold wind protection function is available and it will exit sleep mode after 7 hours.

ECO mode
By pressing this button, the system will run into an power saving mode to save money.

Auto restart
If the system is stopped because of power failure, it will auto restart in the previous settings and mode when the power is back.

Smart air supply
In the cooling mode, the angle of the louver is fixed upward, and in the heating mode, the angle of the louver is fixed downward.

Vertical swing
The outer louver swings vertically to adjust the air supply angle in the vertical direction.

Anti-cold wind
This limits the fan from blowing colder air when in heating mode thus preventing cold drafts.

Button lock
Button lock function prevents children from accidentally pressing the remote controller.

Self-cleaning
When self clean function is activated, the indoor coil dries itself using a 3-stage cycle that minimises the accumulated dust and mould.

Heating at -15 °C
Using inverter technology to achieve stable heating at -15 degrees low temperature.

Celsius & Fahrenheit switch
Convert Fahrenheit and Celsius temperature display to each other via wireless controller.

1W standby
Turn off the power of ODU after 2 minutes in the shutdown state, and disconnect the power of ODU at air supply mode for 2 minutes for power saving.

Do not disturb
One button to turn off the indoor unit beep and LED display, the wind speed is adjusted to low, and the LED light panel is only displayed for 10 seconds each time in the do not disturb mode.

Heating at 8 °C
When the room temperature is lower than 8 °C, the air conditioner automatically starts to maintain the room temperature above 8 °C.

Turbo Mode
Large wind, Reach the set temperature quickly, fast cooling & heating.

Wired controller
Controller board of indoor unit reserves the wired controller port, the air conditioner can be controlled by wired controller.

Refrigerant leakage detection
Only for cooling mode, and it can be judged by detecting the continuous decrease of T2 temperature within a certain period of time.

Horizontal swing
The inner louver swings horizontally to adjust the air supply angle in the horizontal direction.

WIFI control
Remote WIFI control the air conditioner even when you are far away from it.

I FEEL function
The room temperature probe can be set on the remote controller through the I FEEL function, so it detects the room temperature of the remote controller locates.

Golden Fin
Golden fin of indoor and outdoor units are customizable for better appearance and Anti-corrosion performance.

Ionizer
Build in ionizer generator produces ionizer, sterilize and remove dust, purify the air and benefit your health.

Plasma
Build in plasma generator produces plasma, sterilize and remove dust, purify the air and benefit your health.

Special filter
The Vitamin C/Bio/Activated carbon/cold catalyst 3-in-1 special filter improves the air quality.

Filter cleaning reminder
The optional wired equipped with filter cleaning reminder function, it will count the total running time, and reminds to clean the filter when a certain time is reached.

Silence mode
The AC fan is adjusted to the lowest wind to reduce the indoor noise to 20dB(A). Compressor frequency is fixed at low frequency.

Basepan heater
The chassis is heated to prevent the running fan blade damaged by the accumulated snow in winter.
