

## **Thuja occidentalis 'Linesville'**

Globe shaped arborvitae with very soft, feathery foliage. Does not have the typical arborvitae foliage, which may make it more attractive. Stays very compact and keeps its shape very nicely.

**Hardiness Zones** – 3-7

**Sun Exposure/ Watering**- Full sun to light shade, moderately drought tolerant once established

**Mature Plant Size**- 3x4' tall x 3x4' wide after 10 years. Very slow growing

**Bloom Period** – N/A

**Growing Tips** – relatively maintenance free, trim only if necessary

**Uses** Evergreen shrub border, pathways, sidewalks, specimens

**Caring for Thuja occ. 'Linesville'** – fertilize with an evergreen plant fertilizer in spring, protect from drying winds- especially in Winter. If trimming is necessary, only trim the new growth from the current season and remove any Winter dieback. Tolerant of urban pollution. Will need a slightly sheltered planting location. A thick mulch layer in Winter may be beneficial.

### **Pests & Problems of 'Linesville'**

Tolerant of clay soils, black walnut roots, intolerant of dry conditions, bag worms and mealy bugs are possibilities for pests. Damage from ice and snow accumulations.
