

## HOSE STATION POST CONSISTS OF:

- (A) 1 - POST (FAUCET PRE-ASSEMBLED)
- (B) 2 - BOLTS
- (C) 1 - HOSE HOLDER (See reverse side for assembly instructions)
- (D) 2 - WASHERS
- (E) 2 - ACORN NUTS
- (F) 1 - 10' LEADER HOSE
- (G) 1 - SCREW
- (H) 1 - HOSE CLIP
- (I) 1 - FINIAL (May vary per model)

## ASSEMBLY/INSTALLATION OF HOSE STATION:

1. Assemble Hose Holder (C)  
(See reverse side for assembly instructions).
2. Use Bolts (B), Washers (D) and Acorn Nuts (E) to attach Hose Holder (C) to Post(A) (See diagram).
3. Attach Hose Clip (H) on back side of Post (A) with screw (G) provided.
4. Attach Finial (I) to Post (A) by placing the finial on top of the post and lightly tapping down with a rubber mallet until finial sets tight against the post.
5. Create hole in desired location of yard 16" deep.
6. Stand Hose Station in the hole and backfill with soil.
7. Check for vertical and pack backfilled soil firmly around post.
8. Connect Hose (F) to house faucet and hose station fitting.
9. Clip Hose into place (H) at back of post.
