

### **DocaPole GoSaw Kit Assembly Instructions**

- 1. Let the GoSaw's sharp teeth do the work. Focus on the saw's up and down motion and not on trying to press the saw into the wood.**
- 2. After screwing the GoSaw onto a pole, use a screwdriver to tighten the locking screw at the base of the GoSaw. This will further secure the GoSaw onto the end of the pole.**
- 3. Be safe. Tree pruning can be a dangerous activity. Always be sure to wear gloves and eye protection.**
- 4. Enjoy your DocaPole GoSaw!**
