BARN DOOR KITS & ACCESSORIES PRODUCT GUIDE

HARDWARE AVAILABLE IN THREE STRAP DESIGNS AND THREE FINISHES

BD100K Straight Strap Kit
Matte Black Finish

BD101K Top Mount Kit
Bronze Finish

BD102K Bent Strap Kit
Stainless Steel Finish

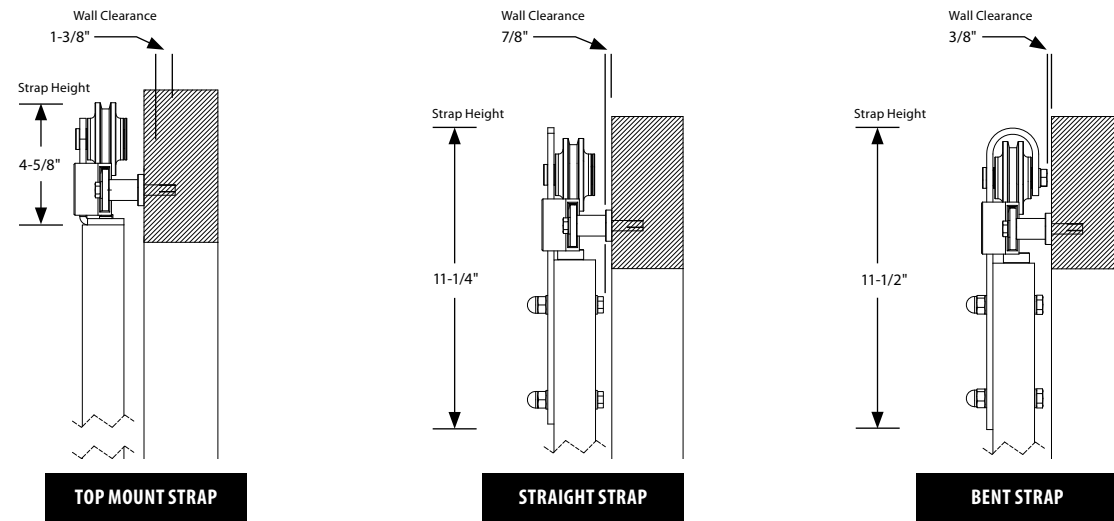

BARN DOOR HARDWARE PRODUCT OVERVIEW

- Choice of carriage bolts with anchors for solid wall installation or wall screws for drywall application
- Standard tracks widths available in 78-3/4" and 96" lengths
- Additional hardware available for Bi-parting and Bypassing applications
- Hanging strap bolts available for doors 1-3/8" and 1-3/4" thick
- 250 lbs. (113.4 kgs.) weight capacity per track
- Standard kits include hardware to hang one single barn door

FEATURES & BENEFITS

- Barn door kit includes: hardened steel hanging hardware with matching track and bottom guide options
- No floor track door design keeps opening clear and hazard-free
- Solid wall bolts or drywall hanging screws install the tracks safely and easily
- Multiple use – ideal for room divider, passage door or closet

Cross Section

Note: Drawings depict a typical solid wall installation without door trim or use of wood blocking for drywall installation. Typical wood blocking measures 7/8" thickness

Track Lengths Available

Note: Mounting board as shown is recommended for drywall installation

78 3/4" Track Hardware Kits:

- Tracks are supplied with five pre-drilled mounting holes to secure directly onto the wall with matching mounting hardware (not included)
- Ideal for use with one door up to 36" wide for finished openings 28" to 32" wide
- Track joiner holes are pre-drilled at each end of the track for bi-parting option

96" Track Hardware Kits:

- Tracks are supplied with six pre-drilled mounting holes to secure directly onto the wall with matching mounting hardware (not included)
- Ideal for use with one door up to 44" wide or two doors 22" wide each with finished openings 34" to 38" wide

OPTIONAL TRACK ACCESSORIES

Bi-parting Hardware Kits:

- Compatible for use with 78-3/4" & 96" tracks
- Ideal for use with two doors up to 44" wide for minimum finished openings of 38" wide
- Available in matching mounting hardware of Matte Black, Bronze and Stainless Steel
- Combines two tracks for wider applications with track joiner shown above

Bypassing Hardware Kits:

- Double application allows two doors to move independently across two tracks
- Ideal for use where the opening is larger than a single door width with limited space constraints
- Slide doors either side to access the opening to maximize your application
- Available in matching mounting hardware of Matte Black, and Stainless Steel
